

dormiente[®]
THE GREEN WAY TO SLEEP

THE NATURALMATTRESSMANUFACTURER

2019

SUSTAINABLE &
HEALTHY SLEEP

OUR PURPOSE FOR MORE THAN 30 YEARS

**SUSTAINABLE &
HEALTHY SLEEP**

It was with this purpose in mind that we made our first mattress over 30 years ago. Because we were simply not satisfied with all the bedding products available then. We wanted mattresses that were not only comfortable to sleep on but were also healthy for people and the environment. Consequently we became the first mattress manufacturer to assume complete responsibility for all aspects of our products. Ever since then we have been conducting innovative and very comprehensive residue tests on the raw materials that go into our products. From the very beginning we realised that the place where we sleep is the place where we recharge – a crucial prerequisite for how productive and efficient we are when we take on the day, every day. These insights have led to our Four-Pillar-Approach:

**ECOLOGICAL RESPONSIBILITY - NO CHEMICAL POLLUTION
SLEEPING IN AN ORTHOPAEDIC HEALTHY WAY
NO ELECTRO-SMOG I NO HARMFUL PHYSICAL EXPOSURE
A HEALTHY & BALANCED MICRO-CLIMATE IN BED**

To this day any product for healthy sleep we have devised follows our Four-Pillar-Approach and can be found in this brochure: natural latex mattresses, duvets, pillows, slatted bed bases, solid wood bed frames, healthy divan beds in boxspring look, sleep sofas and much more. Everything rigorously tested for chemical pollutants and 100% bio. Our daily focus and motivation is and remains the human being – together with the responsibility for our environment. This is why we only work with renewable raw materials that are harvested in an environmentally sensitive manner. We are continuously researching into how we can become more sustainable, both in our products and the general running of our company. We remain true to our conviction. This is our guarantee to you. The only thing you need to do is to decide which of our healthy sleep products suits you best.

For a healthy, restorative and sustainable sleep you are in good hands with our dormiente products.
So, into bed, under the cover and good night!

Your dormiente team

Dr. Rüdiger Plänker, Dr.rer.nat. Ing.Bio.Med.Tech.
with Deduno harvesting latex on the latex plantation
of our Sri Lankan supplier.

IT HAS BEEN SHOWN

The IGR (Association of Back Posture Trainers) recommends our natural latex mattresses NATURAL CLASSIC ORTHOFORM FEMALE and MALE in conjunction with our patented slatted base PHYSIOFORM as an ERGONOMICALLY EFFECTIVE product to help with the **REGENERATION OF THE SPINE.**

Equally persuasive is also the test result of the LGA (a German Technical Control Board): **99 OUT OF 100 POSSIBLE POINTS** awarded to the ORTHOFORM FEMALE and MALE (tested in size 90x200cm with standard cover OPTION 4).

THE CORRECT ORTHOPAEDIC SLEEP POSITION

WELL RESTED

WHAT BLISS, IF YOU CAN TRULY CLAIM TO BE WELL RESTED IN THE MORNING!
 TO MAKE THIS HAPPEN YOU SIMPLY NEED THE RIGHT NATURAL LATEX MATTRESS.
 BECAUSE NATURAL LATEX MATTRESSES ARE PARTICULARLY GOOD AT SUPPORTING YOUR
 BODY IN WAYS THAT ALLOW YOUR SPINE TO RECUPERATE AND REGENERATE ITSELF.

We use certified **ORGANIC COTTON** (kbA)

and certified **ORGANIC WOOL** (kbT)

NATURALLY BALANCED MICRO-CLIMATE

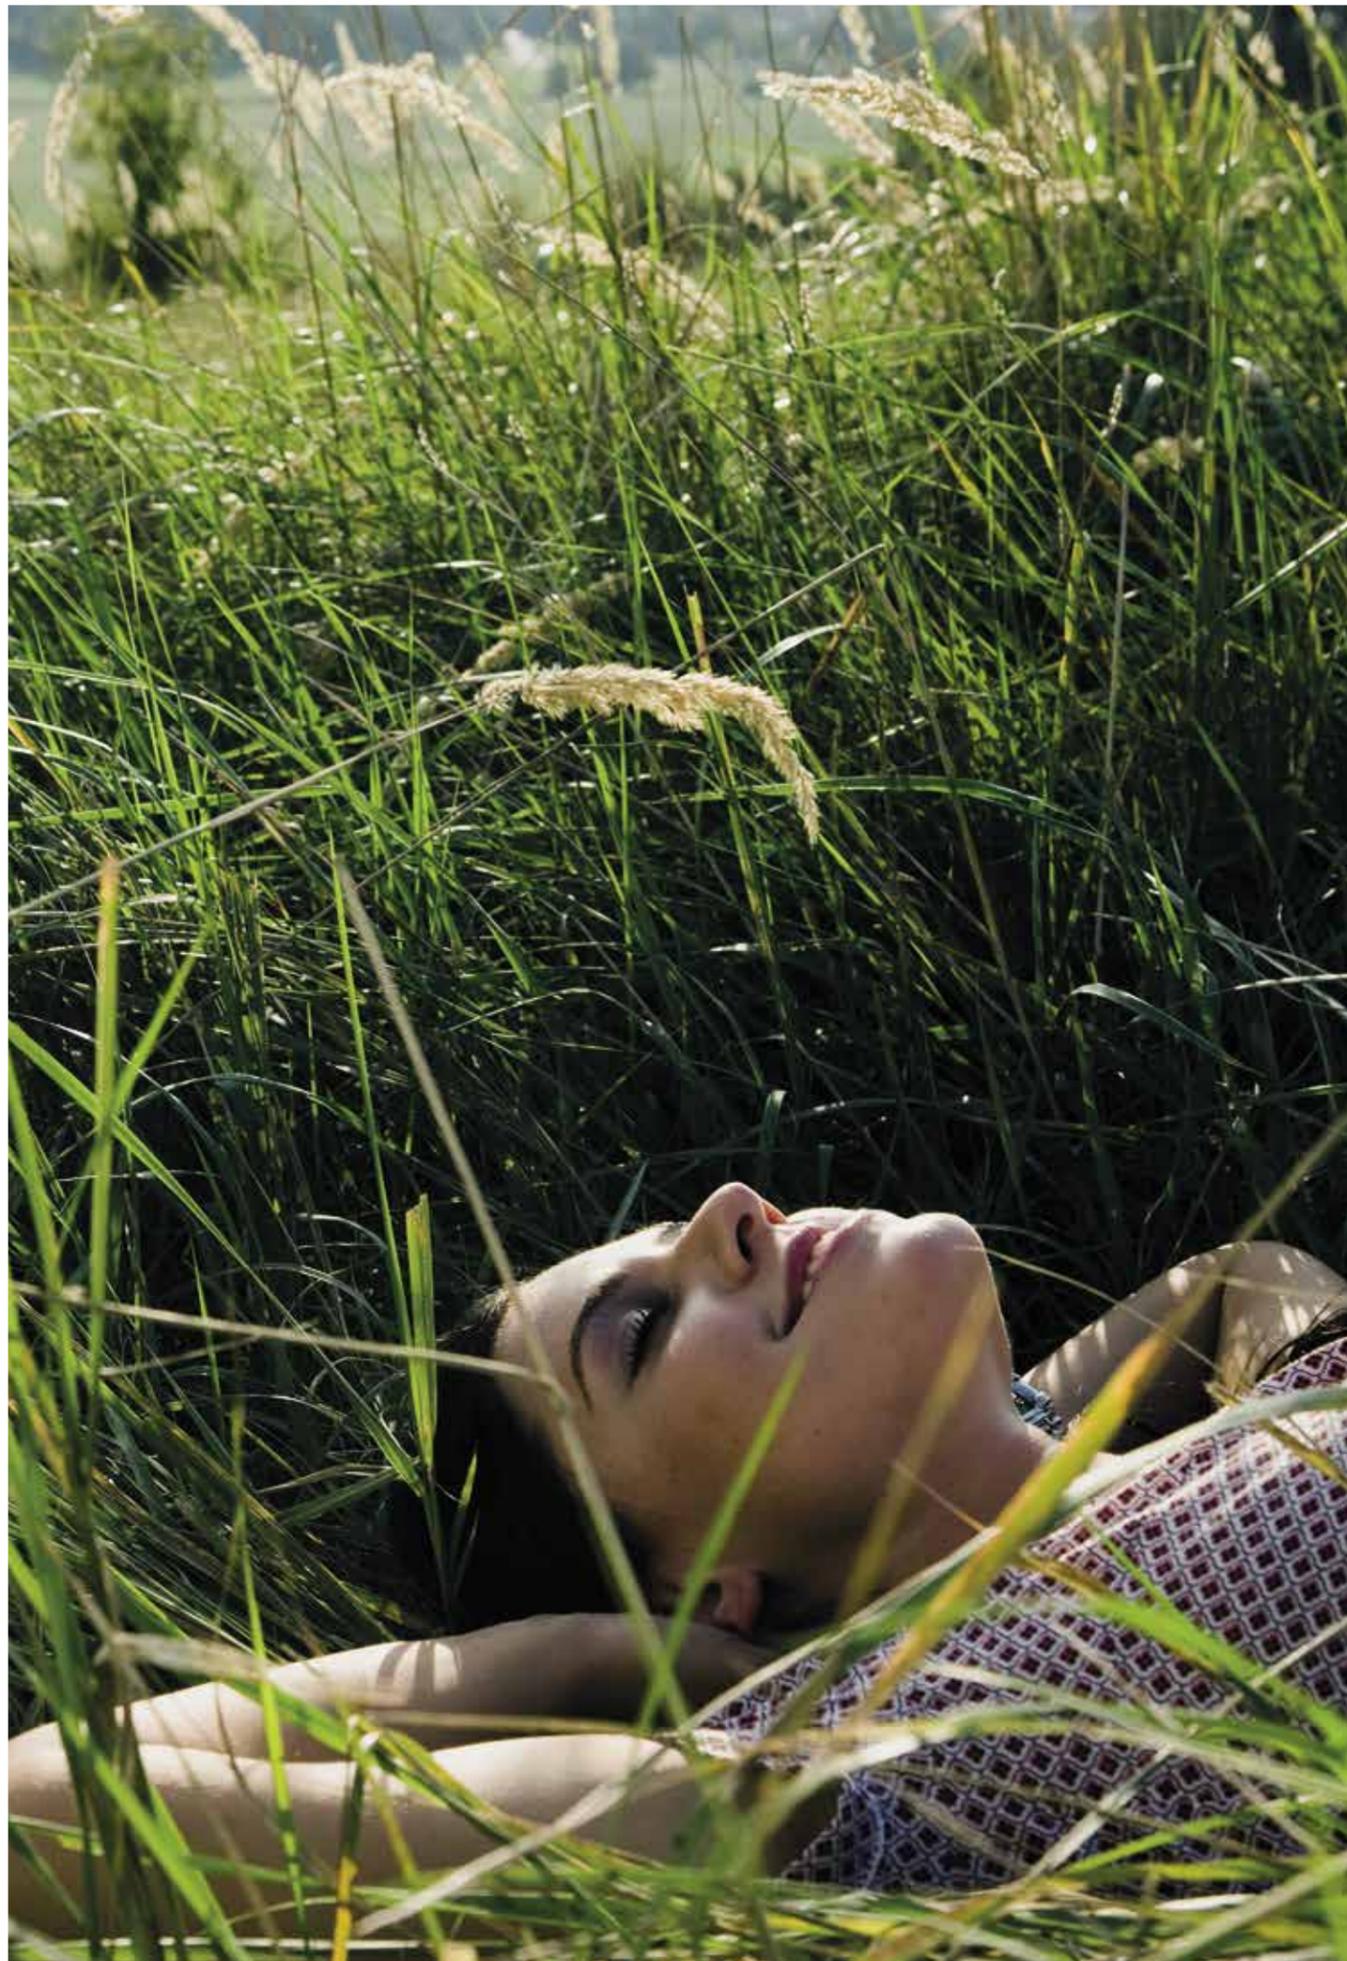

FEELING COMFORTABLE

FREEZING OR SWEATING IN BED IS SO YESTERDAY. LOOK FORWARD TO A COSY BED WITH A HEALTHY MICRO-CLIMATE. OUR NATURAL MATERIALS ARE EXCELLENT AT CREATING JUST THAT.

INTERESTING TO KNOW

While sleeping we lose up to 750ml of moisture predominantly as steam. Pure natural materials such as organic wool and organic cotton are capable of absorbing this steam and isolating it. When airing textiles the next morning the moisture is again released back into the environment. An unbeatable benefit of natural materials as opposed to filling materials made from polyester or polyamide fibres.

ELECTRO-BIOLOGICALLY NEUTRAL

SIMPLY SWITCH OFF

IDEALLY WITH OUR NATURAL LATEX MATTRESSES – FREE FROM METAL SPRINGS.
WAVE ELECTRO-SMOG GOODBYE.

BY THE WAY

If you'd like to know more about the effects of electro-smog on sleep we recommend you have a look at the book 'Stress through Electricity and Radiation' by Wolfgang Maes or simply visit us at www.dormiente.com

QUALITÄTSVERBAND
UMWELTVERTRÄGLICHE
LATEXMATRATZEN e.V.

Certified and tested
according to QUL standards

Our cotton and wool fleeces
come from GOTS certified suppliers.
For the mattress covers
(apart from the upholstery fabrics)
we use fabrics made from GOTS certified
organic cotton.

NATURAL MATERIALS
AND CONTROLLED QUALITY

NATURAL TRUST

THERE ARE FEW THINGS IN LIFE YOU ARE AS CLOSE TO AS TO YOUR MATTRESS.
IT MAKES SENSE THEREFORE TO ENSURE THAT YOUR MATTRESS IS FREE FROM
CHEMICAL RESIDUES OR ENVIRONMENTAL POLLUTANTS.

IT GOES WITHOUT SAYING...

that you can always read up on the results of the tests
conducted on the raw materials used in our mattresses
by visiting www.dormiente.com

NATURAL LATEX HEVEA BRASILIENSIS

An elaborate and sophisticated process turns the milky sap of the tropical caoutchouc tree into what we know as natural latex. Because of its unsurpassed all-point elasticity products such as natural latex mattresses, toppers or pillows respond exactly in the areas where pressure is exerted and – when you change position during sleep – gently spring back into their original shape. No synthetic material shares this quality therefore no synthetic material has a comparable beneficial effect on the regeneration of your discs. Additionally, the modern ‘baking’ processes used in latex production create an open-pore structure which allows for excellent air exchange. We do not know of another raw material that comes even close to creating a similar healthy foundation for orthopaedic correct sleep. Besides natural latex’ excellent energy record this renewable raw material has an additional sustainability bonus: its high all-point elasticity is long lasting therefore making natural latex products very durable. The quality seal QUL guarantees the use of only 100% natural latex and adherence to strict quality criteria with regards to the environmental impact of natural latex mattresses.

FINEST PURE NEW WOOL FROM CERTIFIED ORGANIC HUSBANDRY

Pure new wool is unique in its temperature and moisture regulating abilities. Its specific structure protects the sheep from too much heat and too much cold. This excellent quality of wool also helps to balance the micro-climate in your bed – in summer as in winter. We only use 100% pure new wool from organic husbandry certified under the GOTS scheme. This wool comes from sheep that are raised under high welfare standards and only receive organic feed, but there is yet more to this wool. Organic wool has a very fine, curly texture and fluffy volume. This creates air cushions which help retain body warmth in the winter without trapping heat. Wool can retain up to 30% of its weight in moisture without feeling wet. Wool also dries quickly which is important for a healthy dry and warm micro-climate in bed. Due to the natural lanolin content wool has the capacity to clean and regenerate itself which makes it much easier to care for than is generally assumed. Frequent airing of wool products is usually sufficient. We offer mattress covers for all our ranges that are quilted with organic wool. Unless there are personal preferences (such as an allergy to animal hair) that speak against it, we recommend wool as the material of choice. Natural duvets with wool filling are also excellently suited for summer use which makes them great all-year options, such as our natural duvet LHASA with pure merino wool. The matching pillow, SENSOPILLO MED, also has soothing anti-rheumatic benefits.

PURE COTTON GOSSYPIUM

Harvested from the fruit capsules of the cotton shrub, cotton is a skin-friendly, soft and hardwearing natural fibre. Breathable and moisture balancing cotton can absorb up to a fourth of its weight in humidity, without feeling damp. Compared to wool, its warmth capabilities are only average which is why cotton is ideal for use in warmer temperatures. For our mattress covers we exclusively use cotton from certified organic agriculture. By avoiding pesticides and other agricultural chemicals the skin-friendly qualities of cotton are enhanced. Cotton is a material that is perceived as very pleasant on the skin even by people who are very sensitive.

PRECIOUS HORSEHAIR
(IN ACCORDANCE WITH APPROVED INDUSTRY STANDARD 80% MANE, 20% TAIL)

Formerly a traditional filling and upholstery material we use horsehair because of its durable elasticity to fine-tune the degree of firmness in our natural mattresses. The hygroscopic nature of horsehair – meaning it is excellent at transporting moisture – helps create a dry and warm micro-climate to sleep in. Particularly recommended for people who perspire easily.

KAPOK CEIBA PENTANDRA

Kapok fibres are harvested from the fruit capsules of the wild-growing, tropical kapok tree. Kapok fibres are one of the lightest fibres that exist in nature. Due to its silky feel and sheen kapok is often referred to as plant down. Because of its composition and structure – 64% cellulose and hemi-cellulose and an air gap in the centre of the fibre – this hollow fibre has excellent breathability and insulating properties. A light natural wax coating of the fibre also means that kapok is water-repellent and doesn’t clump when exposed to moisture. It has today not been scientifically verified that products made with kapok are completely immune to dust mite infestations. There are, however, references in journals as to the dust-mite inhibiting properties of this fibre. This is why, for all our mattress ranges you will find at least one cover that contains kapok. Warming in winter and cooling in summer kapok is the ideal alternative for people who have an animal hair allergy. We recommend: the natural duvet NATURAL BREEZE and the loose filled pillow KAPOKPILLO MED.

TENCEL® (BRAND NAME OF THE LYOCELL FIBRE)

In everyday speak often mistakenly referred to as a ‘synthetic fibre’. As opposed to proper synthetic fibres – which are made from raw materials such as crude oil – Tencel® is made from the natural raw material cellulose. In turn, cellulose is derived through an elaborate process from wood grown in sustainable forestry. For its closed-loop, environmentally processing the company Lenzig has been awarded the ‘European Award for the Environment’ by the EU. The smooth and highly stable structure of the fibre together with its excellent capacity to absorb moisture has helped Tencel® to become a success story within the textile industry in the last few years. In its ability to absorb moisture in gas form (i.e. steam) it is far superior to synthetic materials. Tencel® is better at retaining warmth than cotton while still being temperature balancing. This makes it a perfect alternative for people suffering from allergies. This is why we like to use Tencel® in our washable mattress covers and our quilted inner cover for allergy sufferers. To complement this offer we recommend our natural duvet INDIAN SUMMER.

LATEX COATED COIR

Coir, i.e. coconut fibres, that is coated in natural latex sap is a perfect upholstery material: long term elastic and keeping its shape while also moisture-resistant, breathable and very durable. For these reasons we use it a lot to make our children and youth mattresses firm and responsive, to add firmness to adult mattresses and – in conjunction with natural latex – as an upholstery material for our divan beds and sleep sofas.

SWISS PINE WOOD

This wood is traditionally said to have very special properties and for many years people have been saying ‘you can sleep better in a bed made from Swiss Pine’. A study conducted by the Joanneum Research Institute (Weiz, Austria 2003) found that Swiss Pine has beneficial effects on the quality of sleep and the vegetative nervous system. For instance it was noted that the heart rate slowed down in the vicinity of Swiss Pine. In order not to interfere with these benefits, dormiente only finely sands down the Swiss Pine used in its products. No other surface treatments are applied.

For our baby mattresses we use exclusively natural latex certified to GOLS standard.

Our cotton and wool fleeces come from GOTS certified suppliers. For the mattress covers (apart from the upholstery fabrics) we use fabrics made from GOTS certified organic cotton.

TIMBERS used in our products are exclusively from certified sustainable forestry and for most part from sources close to our production facility.

HEALTH AND SUSTAINABILITY

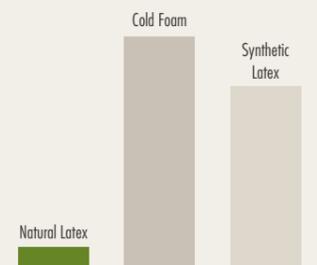

TOMORROW WILL BE A GOOD DAY!

PARTICULARLY FOR YOUR CHILDREN! TREATING OUR NATURAL RESOURCES WITH RESPECT AND USING RENEWABLE RAW MATERIALS IS CERTAIN TO CONTRIBUTE TO A GOOD NIGHT'S SLEEP.

ON SITE

We regularly visit our suppliers to check up on their farming methods and working conditions. Here you see Dr. Plänker with Deduno harvesting latex on the latex plantation of our Sri Lankan supplier.

Energy required for producing natural latex compared to synthetic latex and cold foam.

**AN APPLE
IS NOT A PEAR**

WE MAKE TWO MATTRESSES INTO ONE SO THAT YOU CAN SLEEP SOUNDLY NEXT TO EACH OTHER. OUR OPTIONAL PARTNER SOLUTION UNITES TWO SEPARATE CORES OF EQUAL HEIGHT IN ONE MATTRESS COVER – WITHOUT THE DREADED GAP RUNNING DOWN THE MIDDLE.

THE FEMALE | MALE CONCEPT
ACCOMMODATING THE SUBTLE DIFFERENCES BETWEEN MEN AND WOMEN – AVAILABLE IN 3 COMFORT RANGES

NATURE IS UNIQUE

AND SO ARE MEN AND WOMEN! WE ALLOW FOR THIS FACT BY MAKING MATTRESSES WITH DIFFERENT SURFACE PROFILES. THIS WAY THE MATTRESSES CAN ALWAYS OPTIMALLY FOLLOW THE CONTOURS OF EACH BODY.

FOR MEN

THE MALE CONCEPT

Without special incisions in the hip area to optimally support the narrower male pelvis and a more nuanced dissolution of the mattress surface tension for better body contouring.

FOR WOMEN

THE FEMALE CONCEPT

With special incisions in the pelvic and hip area and a more nuanced dissolution of the mattress surface tension for better body contouring.

TOP-NOTCH CLIMATE The sophisticated incision technique does not only deliver optimal body contouring by your mattress but also creates a healthy and balanced micro-climate letting you sleep really well.

WASHABLE COVERS

CHOOSE FROM 2 VEGAN INNER COVERS

WE'VE MADE IT EASY FOR YOU.
REMOVE IT.
WASH IT.
PUT IT BACK ON.
THE WASHABLE COVERS WITH INNER COVERS OF YOUR CHOICE

1. THE WASHABLE OUTER COVER

2. THE QUILTED INNER COVER

1. THE OUTER COVER

SIMPLE AND PRACTICAL

Because of its wrap-around zipper it is easy to remove the elastic outer cover and put it back on. Underneath you will find the quilted inner cover which is responsible for a healthy, balanced micro-climate in your bed.

Of course you can get the washable outer covers in all of our comfort mattress ranges.

Look out for this symbol.

4 WASHABLE OUTER COVERS
+ 3 QUILTED INNER COVERS TO CHOOSE FROM

BENEFITS AT A GLANCE

- + flexible modular system suitable for any sleep preference
- + easy handling
- + zip divides outer cover in 2 parts
 - fits into any household washing machine
- + ideal for people suffering from allergies

2. THE QUILTED INNER COVER

3 MATERIALS TO SELECT FROM – FOR THE PERFECT MICRO-CLIMATE IN BED

You can choose from 3 different inner covers. All 3 are quilted into 100% cotton jersey and feature a zipper. They can be removed and dry-cleaned.

QUILTED INNER COVER **SW**
from **ORGANIC PURE NEW WOOL**

100% organic pure new wool, approx. 500g/m²

BENEFITS OF THE PURE WOOL QUILTING

- + Finest pure new wool from organic husbandry (kBT)
- + Self-cleaning

The pure new wool quilting creates a superb micro-climate in bed, because the wool we use is particularly fine and can absorb large quantities of steam. To put it simply: the moisture released by you during sleep is quickly absorbed and temporarily retained, hence not interrupting your sleep.

QUILTED INNER COVER **BW**
from pure **COTTON**

100% organic cotton approx. 500g/m²

BENEFITS OF THE COTTON QUILTING

- + Ideal for people suffering from dust-mite or animal hair allergies
- + Pure plant fibres

Being a pure plant fibre cotton is particularly suitable for people suffering from dust-mite allergies. Dust-mites, among other things, live off hair and skin particles. Even though pure cotton has a lower capacity to absorb moisture than wool, it is still the material of choice for allergy sufferers who must or prefer to avoid synthetic materials in bed.

QUILTED INNER COVER **TC**
from **TENCEL®**

100% Lyocell (Tencel®) approx. 500g/m²

BENEFITS OF TENCEL® QUILTING

- + Ideal for people suffering from dust-mite or animal hair allergies
- + Well suited for people who perspire easily

Tencel® is predominantly derived from wood and is what is known as a synthetic plant fibre from renewable sources. It consists of 100% cellulose. Its capacity to absorb moisture in gas form – a key criteria for a healthy and balanced micro-climate – is somewhere between pure new wool and cotton. Tencel® feels similar to cotton and is therefore cooler in touch than wool.

NATURALLY GOOD VALUE FOR MONEY

NATURAL ECO

EXAMPLE COMBINATION
LOOSE FILLED PILLOW **FLEXOPILLO MED**
MATTRESS **NATURAL ECO**
WITH COVER **OPTION 2A**
SLATS **LORDOSIS**

- 100% NATURAL LATEX
- WITH AN INNER JERSEY COVER MADE FROM 100% COTTON

THE MATTRESS COVERS

DRILL hardwearing cover, firmer feel — for people who toss and turn a lot during sleep

OPTION 2A DRILL

100% organic cotton, un-dyed, quilted with 100% **PURE NEW WOOL** (organic) approx. 500g/m², can be dry-cleaned

- + excellent at balancing micro-climate
- + largely self-cleansing

OPTION 2B DRILL

100% organic cotton, un-dyed, quilted with 100% **COTTON** approx. 500g/m², machine washable up to 30°C

- + machine washable
- + suitable for people who suffer from dust mite or animal hair allergies

JERSEY elastic cover, softer feel — for people who prefer a yielding, snug feel when sleeping.

OPTION 3A JERSEY

100% organic cotton, un-dyed, quilted with mit 100% **PURE NEW WOOL** (organic) approx. 500g/m², can be dry-cleaned

- + excellent at balancing micro-climate
- + largely self-cleansing

TYPES OF MATTRESSES AND THEIR LEVELS OF FIRMNESS

- LATEX FIRMNESS MEDIUM OR FIRM
- WITH AN ADDITIONAL INNER JERSEY COVER MADE FROM 100% COTTON

| | LEVEL OF MATTRESS FIRMNESS equivalent to | LEVEL OF LATEX FIRMNESS can be selected from | BODY WEIGHT | BODY SHAPE | |
|---|--|--|-------------------------|---|---|
| NATURAL BASIC Z7  | | | FOR WOMEN FEMALE | FOR MEN MALE | |
| | MALE FEMALE | H2 | MEDIUM | Up to approx. 70 kg | Up to approx. 80 kg |
| | H3 | FIRM | Up to approx. 80 kg | Up to approx. 120 kg |   |
| NATURAL BASIC 2  | H2 | MEDIUM | Up to approx. 70 kg |   | |
| | H3 | FIRM | Up to approx. 120 kg |   | |
| NATURAL BASIC 3  | H2 - H3 | MEDIUM | Up to approx. 90 kg |   | |
| | H4 - H5 | FIRM | Up to approx. 120 kg |   | |
| NATURAL BASIC 4  | H4 | MEDIUM | Up to approx. 120 kg |   | |
| | H5 | FIRM | Up to approx. 120 kg |   | |

H1 = soft **H2** = medium-soft **H3** = medium-firm **H4** = firm **H5** = very firm Please note that these degrees of firmness are guidelines only and that they may differ between manufacturers. We therefore recommend you visit your local dormiente retailer for more detailed information and to personally try out the mattresses.

Your **BODY SHAPE** affects how you lie on a mattress. We differentiate between these types:

NATURAL BASIC
BASIC Z7 FEMALE | MALE
 GOOD BODY ADAPTATION WITH THE SUBTLE DIFFERENCE FOR MEN AND WOMEN

FOR MEN

100% natural latex core

FOR WOMEN

CORE
 FEMALE approx. 14 cm 100% natural latex core with zones profile and additional incisions in the hip area
 MALE approx. 14 cm 100% natural latex core with zones profile
COVER can be selected from the NATURAL BASIC options
INNER JERSEY 100% cotton

BENEFITS AT A GLANCE
 + Soft, body shape accentuating mattress with orthopaedic effective incisions in the shoulder area of the natural latex core and in the FEMALE version also in the hip area
 + Protection of sensitive body parts due to effective distribution of pressure
 + Particularly good at balancing micro-climate
 + Lovely 'nesting' sensation, very comfortable, cosy feel
 + Very helpful to people who suffer from discomfort in their shoulder and hip area
 + For people who primarily sleep on their back or sides
 + Ideal for light-weight, sensitive people

NATURAL BASIC
BASIC 3
 MUTED ALL-POINT ELASTICITY

100% natural latex core

pure horsehair

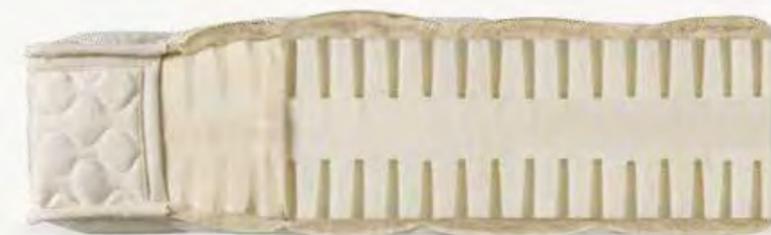

CORE approx. 12 cm, 100% natural latex, approx. 1,000g/m² horsehair on both sides
COVER can be selected from the NATURAL BASIC options
INNER JERSEY 100% cotton

BENEFITS AT A GLANCE
 + Medium-firm mattress with core covered in pure horsehair
 + Muted all-point elasticity
 + Superior balancing of moisture
 + Comfortable warmth thanks to the anti-rheumatic properties of pure horsehair
 + Pleasant, slightly less responsive feel
 + Particularly good for people who perspire easily
 + Suitable for people who sleep on their front
 + Suitable for average or slightly above average weight people

NATURAL BASIC
BASIC 2
 COMFORTABLE BODY CONTOURING

100% natural latex core

CORE approx. 14 cm, 100% natural latex
COVER can be selected from the NATURAL BASIC options
INNER JERSEY 100% cotton

BENEFITS AT A GLANCE
 + Medium-soft natural latex mattress with high all-point elasticity and good body contouring
 + The body is effectively supported and pressure from body weight is evenly spread
 + Comfortable feel
 + Well suited for average weight people
 + Also suited for light-weight people who prefer to sleep on their front (MEDIUM)
 + Suited also for heavier weight people (FIRM)

NATURAL BASIC
BASIC 4
 RESPONSIVE SUPPORT

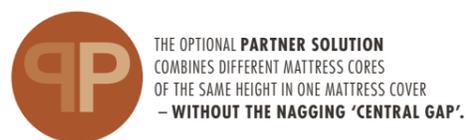

100% natural latex core

latex-coated coir

CORE approx. 5 cm latex-coated coir sandwiched between approx. 4.5cm 100% natural latex
COVER can be selected from the NATURAL BASIC options
INNER JERSEY 100% cotton

BENEFITS AT A GLANCE
 + Firm natural mattress with excellent ventilation of the core
 + Good warming properties and insulation performance
 + Good balancing of moisture
 + Responsive feel on first contact due to the all-point elasticity of 100% natural latex
 + Firm yet responsive feel
 + Suitable for people who sleep on their front (MEDIUM/FIRM)
 + Suitable for people of above average weight (FIRM)

THE OPTIONAL MILBEX TREATMENT WITH NEEM OIL PREVENTS INFESTATION OF THE MATTRESS WITH DUST MITES.

FOR DISCERNING EXPECTATIONS ON HEALTH AND COMFORT

| LEVEL OF MATTRESS FIRMNESS equivalent to | LEVEL OF LATEX FIRMNESS can be selected from | BODY WEIGHT | | BODY SHAPE | |
|--|--|----------------------|----------------------|------------|--|
| | | FOR WOMEN FEMALE | FOR MEN MALE | | |
| BIOFORM | | | | | |
| | H2 - H3 | SOFT | Up to approx. 80 kg | | |
| | H3 - H4 | MEDIUM | Up to approx. 100 kg | | |
| H4 - H5 | FIRM | Up to approx. 140 kg | | | |

H1 = soft H2 = medium-soft H3 = medium-firm H4 = firm H5 = very firm Please note that these degrees of firmness are guidelines only and that they may differ between manufacturers. We therefore recommend you visit your local dormiente retailer for more detailed information and to personally try out the mattresses.

Your **BODY SHAPE** affects how you lie on a mattress. We differentiate between these types:

= Fine-boned, weight is evenly distributed

= Normal to athletic, weight is evenly distributed

= Wider in the hip and narrower in the shoulder area

= Broad shoulders and narrow hips

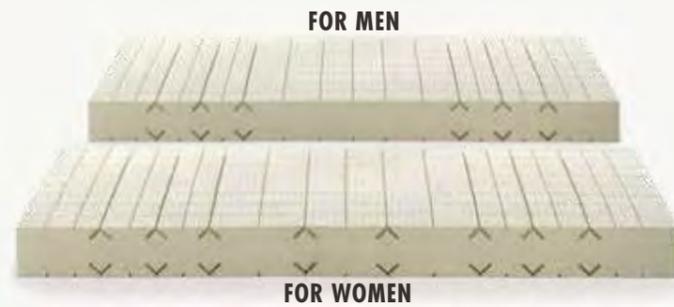

= Weight is concentrated around the middle

NATURAL CLASSIC
ORTHOFORM FEMALE | MALE

FOR THE SUBTLE DIFFERENCE BETWEEN MEN AND WOMEN. VERY FINELY TUNED BODY ADAPTATION THANKS TO TARGETED SURFACE INCISIONS, FURTHER ENHANCING THE EXCELLENT ALL-POINT ELASTICITY OF NATURAL LATEX.

100% natural latex core

- CORE**
FEMALE approx. 15 cm, 100% natural latex core with zones profile and additional incisions in the hip area
- MALE**
approx. 15 cm, 100% natural latex core with zones profile
- COVER**
can be selected from the NATURAL CLASSIC options
- INNER JERSEY** 100% cotton

- BENEFITS AT A GLANCE**
- + Noticeably soft, body shape accentuating mattress with orthopaedic effective incisions in the shoulder area of the natural latex core and in the FEMALE version also in the hip area
 - + Protection of sensitive body parts due to effective distribution of pressure
 - + Very helpful to people who suffer from discomfort in their shoulder and hip area
 - + Particularly good at balancing micro-climate
 - + Lovely 'nesting' sensation, very comfortable, cosy feel
 - + For people who primarily sleep on their back or sides
 - + Ideal for light-weight, sensitive people

NATURAL CLASSIC
ISOFORM
MUTED ALL-POINT ELASTICITY

100% natural latex core

pure horsehair

- CORE** approx. 13 cm 100% natural latex, approx. 1,000g/m² horsehair on both sides
- COVER** can be selected from the NATURAL CLASSIC options
- INNER JERSEY** 100% cotton

- BENEFITS AT A GLANCE**
- + Medium-firm mattress with core covered in pure horsehair
 - + Superior balancing of moisture
 - + Muted all-point elasticity
 - + Comfortable warmth thanks to the anti-rheumatic properties of pure horsehair
 - + Pleasant, slightly less responsive feel
 - + Particularly good for people who perspire easily
 - + Recommended for people who like a warmer environment
 - + Suitable for light-weight people who sleep on their front (MEDIUM/FIRM)

NATURAL CLASSIC
MEDIFORM
COMFORTABLE BODY CONTOURING

100% natural latex core

- CORE** approx. 15 cm 100% natural latex
- COVER** can be selected from the NATURAL CLASSIC options
- INNER JERSEY** 100% cotton

- BENEFITS AT A GLANCE**
- + Medium-soft natural latex mattress with high all-point elasticity and good body contouring
 - + The body is effectively supported and pressure from body weight is evenly spread thanks to excellent natural latex core
 - + Well suited for average weight people
 - + Also suited for light-weight people who prefer to sleep on their front (MEDIUM)
 - + Suited also for heavier weight people (FIRM)

NATURAL CLASSIC
BIOFORM
RESPONSIVE SUPPORT

100% natural latex core

latex-coated coir

- CORE** approx. 5 cm latex-coated coir sandwiched between approx. 5 cm 100% natural latex
- COVER** can be selected from the NATURAL CLASSIC options
- INNER JERSEY** 100% cotton

- BENEFITS AT A GLANCE**
- + Firm natural mattress with excellent ventilation of the core
 - + Good balancing of moisture
 - + Good warming properties and insulation performance
 - + Responsive feel on first contact due to the all-point elasticity of 100% natural latex
 - + Firm yet responsive feel
 - + Suitable for people who sleep on their front (MEDIUM/FIRM)
 - + Recommended for people of above average weight (FIRM)

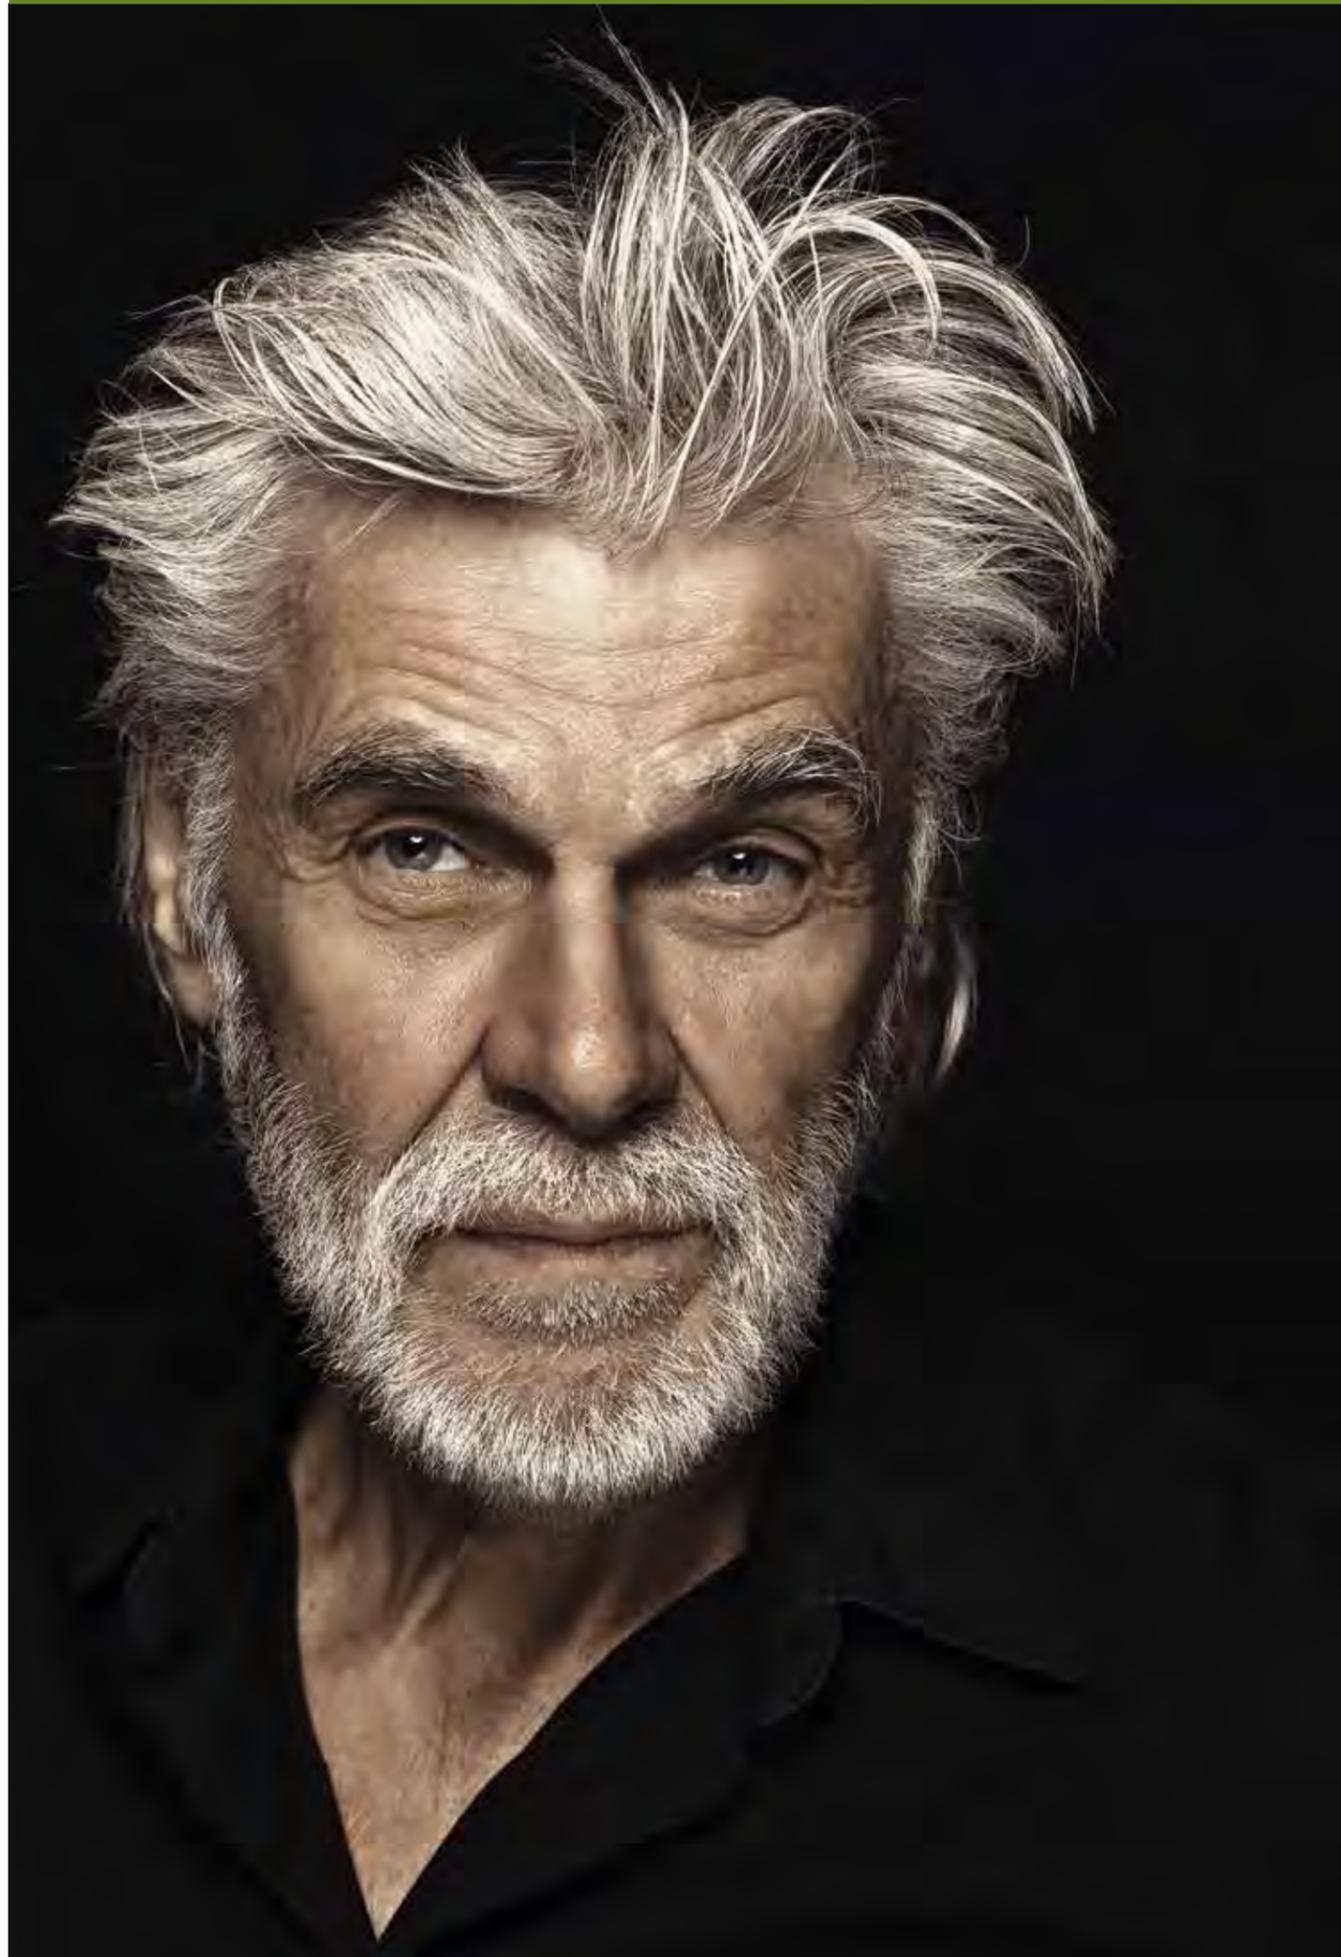

THE OPTIONAL **PARTNER SOLUTION** COMBINES DIFFERENT MATTRESS CORES OF THE SAME HEIGHT IN ONE MATTRESS COVER – WITHOUT THE NAGGING 'CENTRAL GAP'.

THE CORRECT ORTHOPAEDIC SLEEP POSITION

THE OPTIONAL MILBEX TREATMENT WITH NEEM OIL PREVENTS INFESTATION OF THE MATTRESS WITH DUST MITES.

MATTRESS TOPPERS

100%
NATURAL LATEX

To help improve the micro-climate of your mattress and enhance your comfort – particularly if you are sleeping on a cold foam or sprung mattress or on a guest bed – we have developed 3 different types of mattress toppers. They improve a mattress's responsiveness to and support of your body and will let you sleep more comfortably. Also on beds in boxspring look (VEGA and STELLA) your feeling of comfort will be noticeably enhanced. On these beds the toppers will bridge the central gap that can occur when different types of mattresses are used in the same frame.

For our toppers we have come up with 2 different placement concepts. One is the classic OUTSIDE concept where the topper gets placed on top of an existing mattress. The second possibility is the INSIDE concept. Here the topper gets integrated into an existing mattress so that both, mattress and topper, appear as one.

THE INSIDE CONCEPT

This concept integrates the topper into your dormiente mattress so you enjoy the extra comfort of a topper while still enjoying the look of a single mattress. From 2017 on all dormiente mattresses – with covers options 1A, 4, 5, 5A or WB1 are compatible with an INSIDE topper. You will receive an INSIDE topper without outer cover but with a custom assembling-zipper fitted that encloses the topper in your mattress.

Simply place the INSIDE topper of your choice onto the core of your existing mattress and use the assembling-zipper to integrate it within your mattress.

THE OUTSIDE CONCEPT

The idea behind this concept is simple. The topper is finished with and contained in its own cover and is placed on top of your mattress to improve your comfort when lying in bed. That's it really! Optionally you can choose to have some Velcro loops fitted to attach the topper to your mattress and prevent it from sliding. An advantage of this concept is that it is fast and easy to remove the topper and to use it as a small mattress, e.g. when guests arrive.

The optional loops are simply fed through the mattress handles and fixed with the help of Velcro.

SYSTEM 7®

SYSTEM 7®
THE PATENTED SLEEP SYSTEM

PATENTED VALUE

NO MATTER WHICH WAY YOU SLEEP - SYSTEM 7® OFFERS COMPLETE ALL POINT-ELASTICITY OVER THE ENTIRE LENGTH AND BREADTH

SYSTEM 7® Lower Elements:
Natural latex with solid wood slats.
For further fine-tuning you can
remove individual slats.

THE PATENTED SLEEP SYSTEM
SYSTEM 7®
 MOST FINELY-TUNED BODY ADAPTATION

EXCELLENT ALL-POINT ELASTICITY OVER THE ENTIRE LENGTH AND BREADTH OF YOUR BED

When taking into account the shape of the human spine we distinguish between two types of sleeping position: sleeping on your side or back or – fundamentally different – sleeping on your front. With a few simple and quick adjustments SYSTEM 7® can accommodate either of these positions.

SLEEPING ON YOUR SIDE

medium soft firm soft firm firm medium

SLEEPING ON YOUR BACK

medium soft firm soft firm firm medium

SLEEPING ON YOUR FRONT

soft medium firm firm firm soft medium

SYSTEM 7®
TOP MATTRESS NOVA
 PARTICULARLY RESPONSIVE BODY CONTOURING

To ensure that SYSTEM 7® is particularly responsive the top mattress receives a very special surface profile. This, together with its already highly all-point elastic natural latex core, results in the mattress being especially adaptable. A feature which is further enhanced when used with the special slat elements. This is what we know as SYSTEM 7®

Picture shows COVER 3A jersey with pure new wool quilting

HEIGHT approx. 14 cm
CORE approx. 12 cm, 100% natural latex Flexicuts*,
BEZUG **3A jersey fabric** 100% organic cotton, un-dyed, quilted with 100% organic wool approx. 500g/m²
 or **WBI** with quilted inner cover of your choice (see page 32)
INNER JERSEY 100% cotton

BENEFITS AT A GLANCE

- + very responsive natural mattress
- + extremely cosy, comfortable and healthy to sleep on
- + no discernible edges, no 'central gap'
- + comfortable use over the whole breadth of the mattress
- + effective protection of body parts sensitive to pressure
- + suitable for all sleep positions
- + particularly recommended for people with sensitivities in their shoulder or hip areas

*Flexicuts: optimum resource utilisation by using leftover latex trimmings which are re-bonded with natural latex

SYSTEM 7®
LOWER ELEMENTS
 ORTHOPAEDIC BASE THAT CAN BE FREELY ARRANGED

For further fine-tuning you can remove individual slats.

HEIGHT approx. 9 cm
CORE approx. 7.5 cm 100% natural latex
LATEX FIRMNESS as standard 2 x soft, 3 x medium, 3 x firm. The level of latex firmness has been clearly visibly woven into the cover fabric
COVER 60% organic cotton, 28% Lyocell (Tencel®), 12% cotton yarn, dyed, approx. 230g/m²
SLATS each element is supported by 4 wooden slats made from solid, untreated beech wood. You can remove individual slats to further fine-tune your SYSTEM 7® (e.g. to accommodate very sensitive shoulders)

BENEFITS AT A GLANCE

- + Excellent all-point elasticity over the entire length and breadth of your bed
- + Well suited for all sleep positions – depending on arrangement of the soft, medium and firm lower elements
- + Very durable
- + Always adaptable, e.g. during pregnancy
- + Suitable as slatted base for all dormiente mattresses.

THE OPTIONAL **MILBEX TREATMENT** WITH NEEM OIL PREVENTS INFESTATION OF THE MATTRESS WITH DUST MITES.

FOR OUR BABY MATTRESSES WE EXCLUSIVELY USE GOLS CERTIFIED NATURAL LATEX **GOLS**, the global standard for organic latex, is the first and currently the most comprehensive standard covering the sustainable production of natural latex. All processes – from cultivation to production – are subject to strict environmental and social criteria.

THE PERFECT NATURAL MATTRESS FOR GROWING UP HEALTHY

Healthy, restful sleep is particularly important for children. Their organism is sensitive, they react acutely to outside influences, their bones are still soft, their spine not yet fully formed and their immune system still developing. Sufficient sleep is one of the basic requirements for the healthy development of a child.

Ideal is a relatively firm, yet responsive mattress made from natural materials that support the growing spine. Natural latex and latex-coated coir offer exactly these properties. A thick layer of organic pure new wool is a wonderful top layer. It balances temperature, in other words, it diffuses heat and protects from overheating. It also optimally absorbs moisture given off by the body. Because of the special combination of materials, this natural mattress offers a soft, cuddly and warm base that conveys cosiness and relaxation. And, being a natural material with self-cleaning and regenerative properties, pure sheep's wool can also handle a bit of dirt.

FUTON À LA CARTE

OUR OWN MANUFACTURING FACILITIES MAKE IT POSSIBLE. DESIGN YOUR PERSONAL FUTON USING OUR RAW MATERIALS STRICTLY TESTED FOR CHEMICAL RESIDUES. ASSEMBLED AND TUFTED BY HAND IN ALL SHAPES AND SIZES. IF YOU WISH, WE WILL EVEN USE YOUR FAVOURITE FABRIC TO MAKE THE COVER. SURELY THE HEIGHT OF INDIVIDUALITY!

AN EXAMPLE OF AN À LA CARTE MODEL

STANDARD COTTON FUTON
+ pure new wool
+ horsehair
+ natural latex

AND THIS IS HOW TO CREATE YOUR OWN FUTON

As the base for your futon we offer you the Standard COTTON-FUTON, with 4 layers of pure cotton, or the Standard PURE NEW WOOL-FUTON with 4 layers of organic pure new wool, both in a simple pure cotton drill cover. Now you can add your 'special ingredients'. The example shown is a 6cm 100% latex core sandwiched between layers of horsehair to improve temperature and moisture regulation. This core is then placed in the centre of either Model COTTON or PURE NEW WOOL. You can still add, e.g. a layer of organic wool to one side of the mattress for an extra cosy winter side. Et voilà, your special futon is ready. As an extra, you can also purchase an additional washable cover. Maybe in your favourite colour?

The especially sturdy construction of the frame is indicative of solidity and durability.

THE CORRECT FOUNDATION

MAXIMIZE THE POTENTIAL OF YOUR NATURAL LATEX MATTRESS WITH PERFECTLY MATCHED WOODEN SLATS OR A SLATTED SYSTEM. SO THAT EVERY NIGHT WILL FEEL AS IF YOU'RE FLOATING!

THE CORRECT ORTHOPAEDIC SLEEP POSITION

SLATTED BASE
ROLL-UP SLAT FLEXIBEL
FLAT. SPRINGY. INEXPENSIVE.

METAL-FREE

The cotton band attached to the roll-up slats is slightly protruding which prevents squeaking noises.

BENEFITS AT A GLANCE

- + Height approx. 1.5cm
- + Simple, flexible slatted base with bounce
- + 21 slats made from beech plywood
- + 100% cotton band prevents squeaking noises
- + Particularly suitable for bed frames with high slat resting ledges
- + Suitable for all bed frames with full-length slat resting ledges and central struts
- + Metal-free

SLATTED BASE
ROLL-UP SLAT MASSIV
FLAT. RIGID. INEXPENSIVE.

METAL-FREE

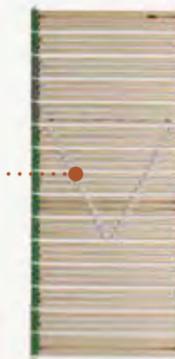

The cotton band attached to the roll-up slats is slightly protruding which prevents squeaking noises.

BENEFITS AT A GLANCE

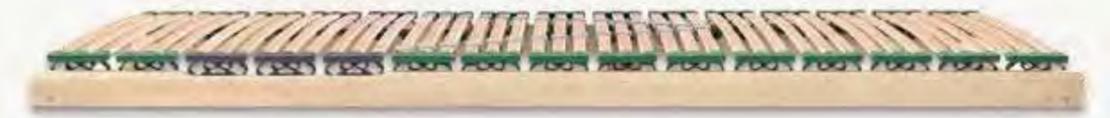

- + Height approx. 1.5cm
- + Simple, rigid slatted base
- + 23 slats made from solid, untreated beech
- + 100% cotton band prevents squeaking noises
- + Particularly suitable for bed frames with high slat resting ledges
- + Suitable for all bed frames with full-length slat resting ledges and central struts
- + Metal-free

WOODEN SPRUNG SLATTED BASE
XXL S
THE MOST STURDY ONE

Firmness can be individually adjusted in an extra large area (approx. 60cm).

3 slats per spring element allow for a specially finetuned adjustment to the body. The spring element itself, due to its high rise positioning, achieves a marked improvement in the feeling of comfort during sleep.

HEIGHT FRAME SPRUNG SLATS

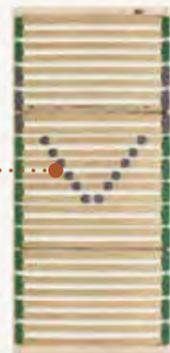

- approx. 9.5 cm (at highest point)
- Extremely sturdy frame made from solid, untreated beech wood
- + 45 strengthened slats on 15 triple spring elements
- + Shoulder comfort zone
- + Option to individually adjust firmness in lower back area

BENEFITS AT A GLANCE

- + For people of above average weight
- + Suitable for all bed frames with slat resting ledges and struts (or at least 3 support points along the frame on which the slats can rest)

WOODEN SPRUNG SLATTED BASE
BASIC S + KF
STURDY AND GREAT VALUE

Firmness in the lower back area can be individually adjusted.

Each individual spring element carries 2 slats made from beech plywood.

Picture shows BASIC S

HEIGHT FRAME SPRUNG SLATS

- approx. 7.5 cm (at highest point)
- Sturdy frame made from solid, untreated beech wood
- + 28 slats on 14 double spring elements
- + Shoulder comfort zone
- + Option to individually adjust firmness in lower back area
- + Head and foot part can be lifted (only KF)
- only BASIC S up to 100cm width

METAL-FREE

BENEFITS AT A GLANCE

- + Suitable for bed frames with high slat resting ledges
- + Suitable for all bed frames with slat resting ledges and struts (or at least 3 support points along the frame on which the slats can rest)

SLATTED BASE
SYSTEM 7®
NUANCED BODY CONTOURING OVER THE ENTIRE LENGTH AND BREADTH OF THE BED

METAL-FREE

arranged for people who sleep on their front

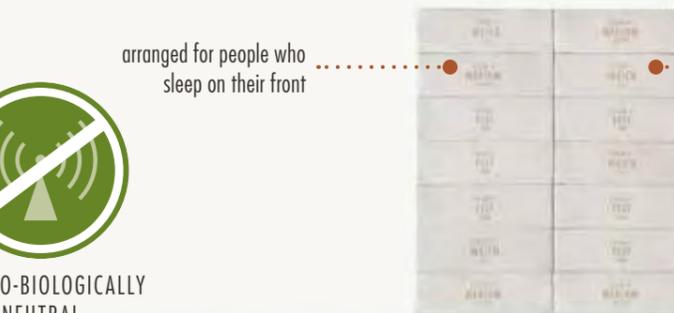

ELECTRO-BIOLOGICALLY NEUTRAL

arranged for people who sleep on their side or back

For further finetuning you can remove individual slats.

HEIGHT COVER

- approx. 9 cm
- Jersey 60% organic cotton, 28% Lyocell (Tencel®), 12% cotton yarn dyed, approx 320g/m², 100% organic cotton drill loops underneath into which wooden slats are inserted, approx 230g/m²
- 1.5cm thick solid beech wood, untreated, finely sanded
- 100% natural latex, 7.5cm high, 3 elements of firm latex, 2 medium and 2 soft ones

WOODEN SLATS UPHOLSTERY

PARTICULARLY SUITABLE FOR

- + Natural latex mattresses where the responsiveness will be further enhance
- + For people who require an excellent all-point elasticity over the entire length and breadth of their bed, even in the centre
- + For people who suffer from sensitivities in the shoulder and hip area
- + for people whose body shape is changing rapidly, e.g. during pregnancy, as easily adjusted

WOODEN SPRUNG SLATTED BASE
LORDOSIS S + KF
 EXCELLENT BODY CONTOURING PARTICULARLY IN THE LOWER BACK AREA

Picture shows LORDOSIS KF

5-level height adjustment to individually adapt to even a very pronounced hollow back.

SHOULDER COMFORT ZONE

The 3 springs element take away pressure from your shoulders.

Picture shows LORDOSIS S

- HEIGHT** approx. 10.5 cm (at highest point)
FRAME Sturdy frame made from solid, untreated beech wood
SPRUNG SLATS
- + 45 slats on 15 triple spring elements
 - + 3 sections in the lower back area feature 5-level height adjustment
 - + Option to individually adjust firmness in lower back area
 - + Shoulder comfort zone
 - + Metal-free (only LORDOSIS S)
 - + Head and foot part can be mechanically lifted (only KF)

PARTICULARLY SUITABLE FOR

- + All people who require fine body contouring in the shoulder and hip area
- + For people suffering from a pronounced hollow back
- + For people with wide hips that may or may not cause sensitivities

- + 40 slats on 20 tandem spring elements
 - + Individually adjustable over the entire frame
 - + Option to individually adjust firmness in lower back area
 - + Slats on pivot hinges that fine tune to your body
 - + Metal-free (only PHYSIOFORM S up to 100 cm width)
 - + Head and foot part can be mechanically lifted (only KF)

PARTICULARLY SUITABLE FOR

- + People with broad or sensitive shoulders
- + People with wide hips or a sensitive pelvic area
- + All types of mattresses, particularly mattresses made from 100% natural latex

new

SHOULDER COMFORT ZONE

DISC FRAME ERGO NATURA ZIRBE S NUANCED BODY CONTOURING WITH THE SPECIAL EFFECT OF SWISS PINE

METAL-FREE

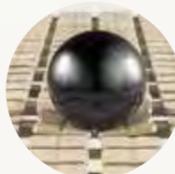

ERGO NATURA's discs are made from untreated Swiss Pine wood

Every single row of freely moving discs is also flexibly set. This increases the overall adaptability and enhances the beneficial impact of each disc.

The free moving, small Swiss Pine discs can accommodate even unusual shapes extremely well and can therefore optimally support the spine.

Additionally, the shoulder comfort zone is able to respond to the shape of your shoulders over the entire row of discs.

With the help of a brace (red) it is possible to tighten each individual spring element for a firmer feel should this be required.

HEIGHT FRAME SPRUNG SYSTEM

- approx. 12.5 cm (at highest point)
- Sturdy frame made from solid, untreated beech wood
- + always two 13mm thick Swiss Pine discs per spring element
- + discs are set in 3D function
- + 144 individual discs per frame (90 x 200 cm)
- + Very nuanced body contouring thanks to freely moving Swiss Pine discs
- + Additional shoulder comfort zone
- + Calming effect of the Swiss Pine wood
- + Metal-free

PARTICULARLY SUITABLE FOR

- + People who require or prefer a very responsive base which can contour to the shape of their body
- + People who know of and value the calming effect of Swiss Pine wood
- + Any sleep position

THE BENEFICIAL PROPERTIES OF SWISS PINE WOOD

For a long time people have attributed special properties to Swiss Pine wood such as „one sleeps better in beds made from Swiss Pine“. A study by the Joanneum Research Institute (Weiz, Austria 2003) has found that Swiss Pine has a beneficial effect on sleep and the vegetative nervous system. For instance, when sleeping in a bed made from Swiss Pine, the heart rate is found to be reduced. To make optimal use of this property dormiente only finely sands the Swiss Pine timber without applying any further surface finish or treatment.

ORTHOPAEDIC EFFECTIVE CORES MADE FROM 100% NATURAL LATEX

Our anatomically shaped neck support pillows have one unbeatable advantage: they feature excellent all-point elasticity and can thus perfectly follow the contours of your spine. We offer different types of cores – some even multi-functional – which suit different body shapes and sleep positions.

OUTER COVER stretchy jersey cover made from 100% high-purity cotton to prevent allergies caused by mould spores, machine-washable up to 60°C.

INNER COVER 100% pure cotton case. All Shaped Pillows are **SUITABLE FOR USE BY ALLERGY SUFFERERS.**

Picture shows ERGOPILLO MED

WHICH PILLOW SUITS WHICH SLEEP POSITION?

Choosing the correct pillow is a major factor in achieving healthy sleep but is often underestimated. Apart from orthopaedic criteria you will also need to consider a healthy moisture and temperature balance and what you perceive to be comfortable and cosy. From an orthopaedic perspective, a pillow should hold your head and enable your cervical spine to stay in its natural position. Because the neck is a relatively small, restricted area, it is difficult for the head to be held well and

effective. Personal preferences, such as having your head in an elevated position, are often counterproductive to healthy sleep. In addition to all this, you also have to take into account your actual position during sleep. Waking up every morning with feelings of stiffness and tension in your neck and shoulders may indicate bad positioning of your head during sleep.

If you sleep on your **FRONT**, your pillow should be flat rather than voluminous. This is so that you do not over-stretch your cervical spine and put undue pressure on the discs in this area.

If you sleep on your **SIDE** your pillow needs to be able to bridge the gap between your head and your shoulders, preventing your cervical spine from being over-stretched.

If you sleep on your **BACK**, a flatter rather than a too voluminous a pillow will provide orthopaedic benefits.

IDEAL DIMENSIONS

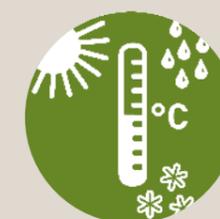

As standard dormiente offer the narrower pillow size of 40x80cm or 40x60cm, which is also the size recommended by many orthopaedists and physio-therapists. To ensure that your mattress can optimally support your shoulders, only your head and neck should be touching your pillow. This is not the case for bigger pillows, such as 80x80cm, where part of your upper body is resting on the pillow.

KEEP A COOL HEAD

Make sure that your head and neck area is kept in a healthy micro-climate environment. Perspiration occurs quickly, especially in this area which is why a pillow needs to be made from materials that can effectively absorb and release moisture in the form of gas. This way you don't start to sweat. Natural materials such as cotton and pure new wool are particularly good at this, synthetic materials much less so.

GET IT CLEAN QUICKLY

A few words on the topic of hygiene: all dormiente pillows are equipped with an additional, washable cover made from high purity 100% cotton. This is particularly interesting for people suffering from allergies. Independent of this – as pillows generally receive lots of use and wear and tear – they should be replaced every 1 to 2 years for hygiene reasons.

LOOSE FILLED PILLOW

ISOPILLO MED

MUTED ELASTICITY AND EFFECTIVE BALANCING OF MICRO-CLIMATE

MADE WITH PURE NATURAL MATERIALS

FITS THE FOLLOWING PILLOW CASE SIZES

approx. 40 x 60 cm or 40 x 80 cm

FILLING kapok fibres | natural latex mix 30:70

WEIGHT OF FILLING approx. 1,000 g

HEIGHT approx. 14 cm

BENEFITS AT A GLANCE

- + Medium bounce for excellent muscle relaxation
- + Good for summer (cooling) and winter (warming) due to insulating properties of the hollow fibre kapok
- + Particularly recommended for people suffering from allergies

MADE WITH PURE NATURAL MATERIALS

LOOSE FILLED PILLOW

KAPOKPILLO MED

MOULDBLE NECK SUPPORT PILLOW
MADE FROM PURE PLANT FIBRES

FITS THE FOLLOWING PILLOW CASE SIZES

approx. 40 x 60 cm or 40 x 80 cm

FILLING 100% kapok fibres

WEIGHT OF FILLING approx. 800 g

HEIGHT approx. 15 cm

BENEFITS AT A GLANCE

- + Excellent balancing of micro-climate, very insulating
- + Relaxing support of the neck thanks to non-yielding, non elastic plant fibres
- + Pure plant fibre filling
- + Very light-weight pillow due to hollow fibres

FLEXOPILLO MED

OPTIMAL ADAPTABILITY TO ALL TYPES OF HEAD AND NECK SHAPES

FITS THE FOLLOWING PILLOW CASE SIZES

approx. 40 x 60 cm or 40 x 80 cm

FILLING 100% natural latex, flaked and cut

WEIGHT OF FILLING approx. 1,600 g

HEIGHT approx. 13 cm

BENEFITS AT A GLANCE

- + Very springy and elastic with gentle bounce to help relaxation of muscles
- + Completely machine-washable
- + Individually adaptable

FITS THE FOLLOWING PILLOW CASE SIZES

approx. 40 x 60 cm or 40 x 80 cm

FILLING Swiss Pine shavings | natural latex flakes 25:75

WEIGHT OF FILLING approx. 1,650 g

HEIGHT approx. 11 cm

BENEFITS AT A GLANCE

- + Swiss Pine wood exerts a soothing influence on the entire organism and vegetative nervous system*
- + Has anti-bacterial properties and is moth repellent
- + Swiss Pine helps to alleviate sensitivities to changes in the weather
- + Due to the natural latex flakes particularly elastic with gentle bounce to help relaxation of muscles

- + Orthopaedic design neck support pillow
- + Relaxing support of the neck thanks to elastic natural latex core
- + 'All-round' suitability due to statistically derived height for support of neck and spine
- + Particularly suitable for people who sleep on their sides or back
- + Offers soft and responsive 'nesting' feeling

new
NOW
EVEN MORE SOFT
AND COSY

PURE ANTICIPATION

COSY WARMTH AND THE FEELING OF COMFORT. THE VERY BEST NATURAL MATERIALS USED IN THE DORMIENTE DUVETS CREATE A HEALTHY MICRO-CLIMATE IN BED.

Choosing the correct duvet is a key requirement for healthy sleep. This is evident from the fact that about 70% of the micro-climate prevalent in a bed can be created by the duvet. The micro-climate is essentially determined by the materials that are used to make the duvet and their capacity to absorb steam. The moisture generated while we sleep needs to be absorbed by our

environment — the quicker the better. Natural fibres and hairs are much better at doing this than synthetic fibres such as polyester or polyamide. This is why you will look in vain for polyester fleece in our duvets. The only materials you will find in our duvets are pure, top quality natural fibres with the best provenance strictly tested.

QUILTING PATTERNS
WHY DO THEY DIFFER?

THE BODY CONTOURING PATTERN

HEAD ZONE

FOOT ZONE

The asymmetrical pattern, also known as mummy-pattern, is something very special. Because it has a head- and a foot zone, it is able to optimally mould to and envelope your body. To make sure no cold air can enter from the side and disturb your sleep, it features lengthwise quilting that 'seals' the blanket on either side and keeps you warm and snug.

THE SHAPE RETAINING PATTERN

The diamond-shaped, checked pattern is used for duvets that contain very light-weight plant fibres, e.g. kapok. It helps the duvet to keep its shape after washing thereby ensuring that the filling is equally distributed over the duvet creating a balanced micro-climate.

MATTRESS PAD QUILTING PATTERN

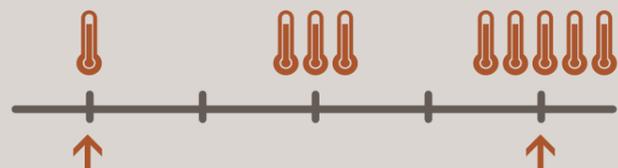

For mattress pads we use a smaller diamond-shaped pattern that ensures durability and stability of the pad.

SUMMER, WINTER, TRANS-SEASONAL

THE PERFECT DUVET FOR EVERY SEASON!

So you can select exactly the right duvet for you, we offer our natural duvets with 3 different levels of filling weight. For the warmer months we recommend our SEASON duvets with an approx. filling weight of 800g in the standard size 135x200cm. For the winter months we offer our DELUXE-DUO DUVETS that have an approx. filling weight of 1,600g. For the times in between we recommend our ALL SEASON duvets with a filling weight of approx. 1,200g.

LOW

PERSONAL REQUIREMENT FOR WARMTH

HIGH

PERSONAL REQUIREMENT FOR WARMTH

MADE TO MEASURE. FOR YOU.

Our duvets don't come 'off the shelf', but are individually made by hand. Because we want to be able to fulfil your personal requirements, we offer 18 different standard sizes – also international ones. And if you still want a different size: no problem, we will make it for you!

18 DIFFERENT DUVET SIZES

| | | |
|--------------|--------------|--------------|
| 100 x 135 cm | 155 x 220 cm | 200 x 220 cm |
| 135 x 200 cm | 155 x 240 cm | 200 x 240 cm |
| 135 x 220 cm | 160 x 210 cm | 220 x 220 cm |
| 140 x 200 cm | 160 x 240 cm | 225 x 220 cm |
| 140 x 220 cm | 200 x 200 cm | 240 x 220 cm |
| 155 x 200 cm | 200 x 210 cm | 260 x 220 cm |

MIX AND MATCH.

All our duvets are equipped with poppers so that different duvet types can be combined with each other. For the summer you have chosen a light-weight, washable duvet, such as our NATURAL BREEZE SEASON. But for the winter you want something warmer? One, very practical, solution could be an additional LUXOR ALL SEASON camelhair duvet. Simply attach the two duvets to each other and voilà, you've got yourself a new winter duvet. From now on you can use the duvets separately or together, whatever feels right.

DUO DUVET DELUXE

We don't just loose fill the very fine filling into our DELUXE DUVETS but quilt it inside two separate 'half' duvets of approx. 800g filling each. These 'half' duvets are divided by 100% cotton jersey fabric and then sewed together. Hence the name DUO DUVET. This very elaborate process creates an air gap between the two 'half' duvets which acts as additional insulation. Resulting in the perfect cosy environment to sleep in.

KAPOK COTTON DUVET
NATURAL BREEZE
 MADE FROM PURE PLANT FIBRES ALSO SUITABLE FOR ALLERGY SUFFERERS

FILLING
 70% kapok fibres
 30% organic cotton

COVER
 100% organic cotton

The NATURAL BREEZE duvet is made from pure plant fibres – kapok and cotton. This is why it is also suited for people suffering from allergies. Kapok is a hollow fibre consisting of 80% air and is one of the lightest fibres available. A high amount of air is trapped in the cavities of the fibre which gives kapok excellent insulation properties. Kapok cools in the summer and preserves body heat in the winter. The kapok tree is not cultivated on plantations but only grows in tropical mixed forests – where no pesticides or insecticides are used or needed. NATURAL BREEZE is machine washable up to 60°C.

THE SHAPE RETAINING PATTERN

TENCEL®-DUVET
INDIAN SUMMER
 MADE FROM PURE PLANT FIBRES ALSO SUITABLE FOR ALLERGY SUFFERERS

FILLING
 100% cellulose

COVER
 100% organic cotton

INDIAN SUMMER is a duvet with a 100% plant fibre filling made from Tencel® and a cover made from 100% organic cotton satin. Tencel® is a 100% cellulose fibre mainly derived from wood using a physico-chemical process. The specific characteristics of Tencel®, as opposed to cotton, is its high capacity to absorb and balance moisture. Synthetic fibres, such as polyamide or polyester, hardly absorb moisture at all. Additionally Tencel® has very good insulating properties and hence creates a dry, comfortable sleeping environment. This duvet is easy to care for and machine washable at up to 60°C degrees which is why it is particularly suitable for people who suffer from excessive perspiration and for those with a dust mite allergy.

THE BODY CONTOURING PATTERN

BENEFITS AT A GLANCE

- + Pure cellulose fibre, derived from wood
- + Healthy, dry sleeping environment
- + Good capacity to absorb moisture, breathable
- + Machine washable
- + Well insulating
- + Particularly suited for people suffering from dust mite or animal hair allergies
- + Strictly tested for chemical residues

FILLING*

MACHINE WASHABLE UP TO 60°C

* For the standard size 135x200cm

NATURAL DUVETS

MERINO LAMBSWOOL DUVET LHASA

FILLING
pure lambswool

COVER
100% organic cotton

For our LHASA duvet we use pure merino wool. Merino wool is very fine and frizzy. The finer the hair and the tighter the curls of the fibres, the greater is its capacity to absorb moisture and the greater is its insulation value. The result is a duvet that can optimally balance moisture and temperature. We use exclusively lambswool which means wool from the first shearing. These hairs are particularly soft and fine. The outer cover is made from finest organic cotton satin fabric which is soft and velvety to the touch and light and pleasant on the skin.

THE BODY CONTOURING PATTERN

BENEFITS AT A GLANCE

- + Finest merino lambswool and very good value for money
- + Excellent at balancing temperature and moisture
- + Cosy and dry micro-climate in bed
- + Good insulation properties, temperature balancing
- + Voluminous and cosy, feeling of comfort during sleep
- + Moulds well to your body
- + Strictly tested for chemical residues
- + Durable

NATURAL DUVETS

CASHMERE-DUVET LADAKH

FILLING
100% cashmere wool

COVER
100% organic cotton

Our LADAKH duvet is filled with pure, un-dyed cashmere wool covered in superior quality cotton satin. This particularly fine wool is harvested from the under-belly down of the cashmere goat and carefully made into a fleece. Due to its very fine hairs cashmere is highly insulating with excellent moisture absorption. A cashmere duvet is unsurpassed in creating a dry and warm sleeping environment. It is particularly recommended for people who feel the cold easily. This duvet is available as an ALL SEASON weight with a filling of approx. 1,200g for a standard size 135x200cm.

THE BODY CONTOURING PATTERN

BENEFITS AT A GLANCE

- + Finest cashmere goat down hair

FILLING*

ALL SEASON ALL YEAR DUVET approx. 1,200 g | approx. 440 g/m²

DRY-CLEANING ONLY

* For the standard size 135x200cm

NATURAL DUVETS

CAMEL DOWN HAIR DUVET **LUXOR**

FILLING
finest camelhair

COVER
100% organic cotton

The finest camelhair is a very special and valuable material. A maximum of 5,000 grams can be collected per camel per year. The very fine underbelly hair is characterised by its superior insulation properties which can effortlessly balance large differences in temperature. Its special and very fine structure makes camelhair the perfect material for creating a cosy sleeping environment with optimally balanced moisture and temperature levels. Ideal conditions for healthy and restful sleep. The outer cover is made from finest organic cotton satin which is soft and velvety to the touch and very pleasant on the skin.

THE BODY CONTOURING PATTERN

BENEFITS AT A GLANCE

- + Finest camelhair with excellent moisture absorption and high insulation properties
- + Superb micro-climate in bed

HYGIENE PROTECTION FOR EVERY MATTRESS
 + ESPECIALLY SUITABLE FOR PEOPLE WHO PERSPIRE HEAVILY
 + NATURAL MATTRESS PROTECTION USING 100% ORGANIC COTTON
 + WASHABLE UP TO 95°C
 + COTTON FROM CERTIFIED ORGANIC CULTIVATION
 IDEAL FOR ALLERGY SUFFERERS

BRUSHED COTTON MATTRESS PROTECTOR
NATURAL PROTECT

A hygienic sleeping environment is not only an important consideration for allergy sufferers. This is why we have developed our brushed cotton mattress protector NATURAL PROTECT that will help keep your mattress hygienically clean. This protector is much easier and quicker to wash than a quilted mattress cover. For extra durability we use twined, pilling-resistant yarns made from certified organic cotton. Because NATURAL PROTECT is made from a heavy-weight cloth it is particularly absorbent. To prevent sliding, sturdy elastic corner bands offer a secure grip on the mattress.

100% organic cotton, elasticated straps on corners, machine washable up to 95°C, un-bleached

Available in 200cm length and in the following widths 80 | 90 | 100 | 120 | 140 | 160 | 180 | 200 cm. Special sizes available upon request.

Please wash NATURAL PROTECT before the first use to get the perfect fit and optimal absorbency.

**WE'RE
 KEEN
 ON CLEAN**

HYGIENE AND A HEALTHY MICRO-CLIMATE FOR YOUR BED: QUICK. EASY. EFFECTIVE

FITTED SHEET **DERMA DRY®**

DERMA DRY looks like a regular fitted sheet but can do so much more. The fabric was developed to be used in hot climates and by people who perspire heavily. In the same way sports and active wear works, the moisture coming off your skin is absorbed fast onto the surface of the fabric and evaporates much more quickly than with other fabrics. The chill caused by the evaporation has an additional cooling effect. Moisture evaporates quickly and you can sleep undisturbed. Marvellous, don't you think?

80% cotton, 20% polyester, washable up to 60°C
 Available in 200cm | 210cm | 220cm lengths and in the following widths: 80 | 90 | 100 | 120 | 140 | 160 | 180 | 200 cm.
 Special sizes available upon request.

PLUSFACTOR If you are using two separate mattresses in your double bed, we recommend you opt for a larger size protector together with a larger fitted sheet which covers both mattresses. This way you create a uniform mattress surface without the nagging central gap between the mattresses.

When it comes to healthy sleep, a lot of our focus and work goes into the topic of allergies. Nowadays approx. 20% of the population suffer – directly or indirectly – from allergies. We differentiate between natural and synthetic allergens, i.e. the substances that trigger allergies.

To keep our products free from synthetic allergens we subject our raw materials to fastidious checks, e.g. for agricultural sprays. We are getting better and better at this and you can see for yourself at test results at www.dormiente.com.

Natural allergies are triggered by substances that occur naturally in our environment, such as pollen or dust mites. When it comes to your sleeping environment the latter are the most common causes of allergy. We offer various products and treatments that can help with this type of allergy. Dust mites feed off hair and skin particles and thrive in moist and warm environments.

A dry environment and removable covers that can either be washed or dry-cleaned help to prevent a dust mite infestation. We offer various covers for allergy sufferers for different requirements. We offer pure cotton mattress covers with or without plant fibre quilting. But we also offer mattress covers made with a small percentage of synthetic fibres that can be washed more easily and at higher temperatures. Some covers have kapok fibres added to the fabric. Depending on the severity of your allergy, you will be able to select the product just right for you.

Our quilted inner covers made with various plant-fibres and used in conjunction with a washable cover means we can also offer allergy sufferers a healthy micro-climate to sleep in. Make sure you also consider the suitability of your duvet and use fitted sheets on your mattress that are easily washable and made from special cotton.

We have developed an entire range that satisfies the special requirements of people suffering from allergies. We can even treat our mattresses with Neem oil – a plant-based, biological dust mite repellent – which is derived from the Indian Neem tree.

FOR ALLERGY SUFFERERS

A FEW WORDS ON THE TOPIC OF LATEX ALLERGIES:

Latex allergies predominantly occur in the medical field where rubber gloves are regularly worn. Latex allergy is a contact allergy. It has been shown that this allergy has never occurred as a result of mattress cores made from 100% natural latex. One reason for this is the fundamentally different production process for mattress cores and rubber gloves.

NATURAL BASIC RANGE

NATURAL CLASSIC RANGE

NATURAL DELUXE RANGE

WASHABLE COVERS

Our removable mattress covers are even more easy maintenance with 3 quilted inner covers to choose from: the outer cover which can easily be removed, washed and put back on. The inner cover creates a healthy micro-climate and is available in 3 different options. For more information see page 18-19.

MILBEX TREATMENT

On request we can treat a mattress with Neem oil to naturally protect it from dust mite infestation. MILBEX is a spray which is derived from the seed of the Neem tree. It contains so called secondary plant substances of the Neem tree that act as a natural insect repellent.

KAPOK COTTON DUVET NATURAL BREEZE

The filling of the NATURAL BREEZE duvet is made up of a mix of kapok, a hollow plant fibre, and pure cotton. This duvet feels pleasant on the skin and can, of course, be machine washed at 60°C. For more information on our natural duvets please see page 74 ff.

TENCEL®-DUVET INDIAN SUMMER

Pure cellulose, derived from wood, forms the basis of our duvet INDIAN SUMMER with Tencel® filling in a cover made from finest organic cotton satin. The particular strength of this machine washable ALL SEASON DUVET is its ability to create a balanced micro-climate. For more information on our natural duvets please see page 74 ff.

KAPOK COTTON MATTRESS PAD NATURAL BREEZE

The cover is made from pure organic cotton satin. The filling is a mix of kapok and cotton. Premium quality for sensitive people! To prevent sliding, sturdy elastic corner straps offer a secure grip on the mattress. NATURAL BREEZE MATTRESS PAD is machine washable at 60°C. For more information on our natural mattress pads please see page 83.

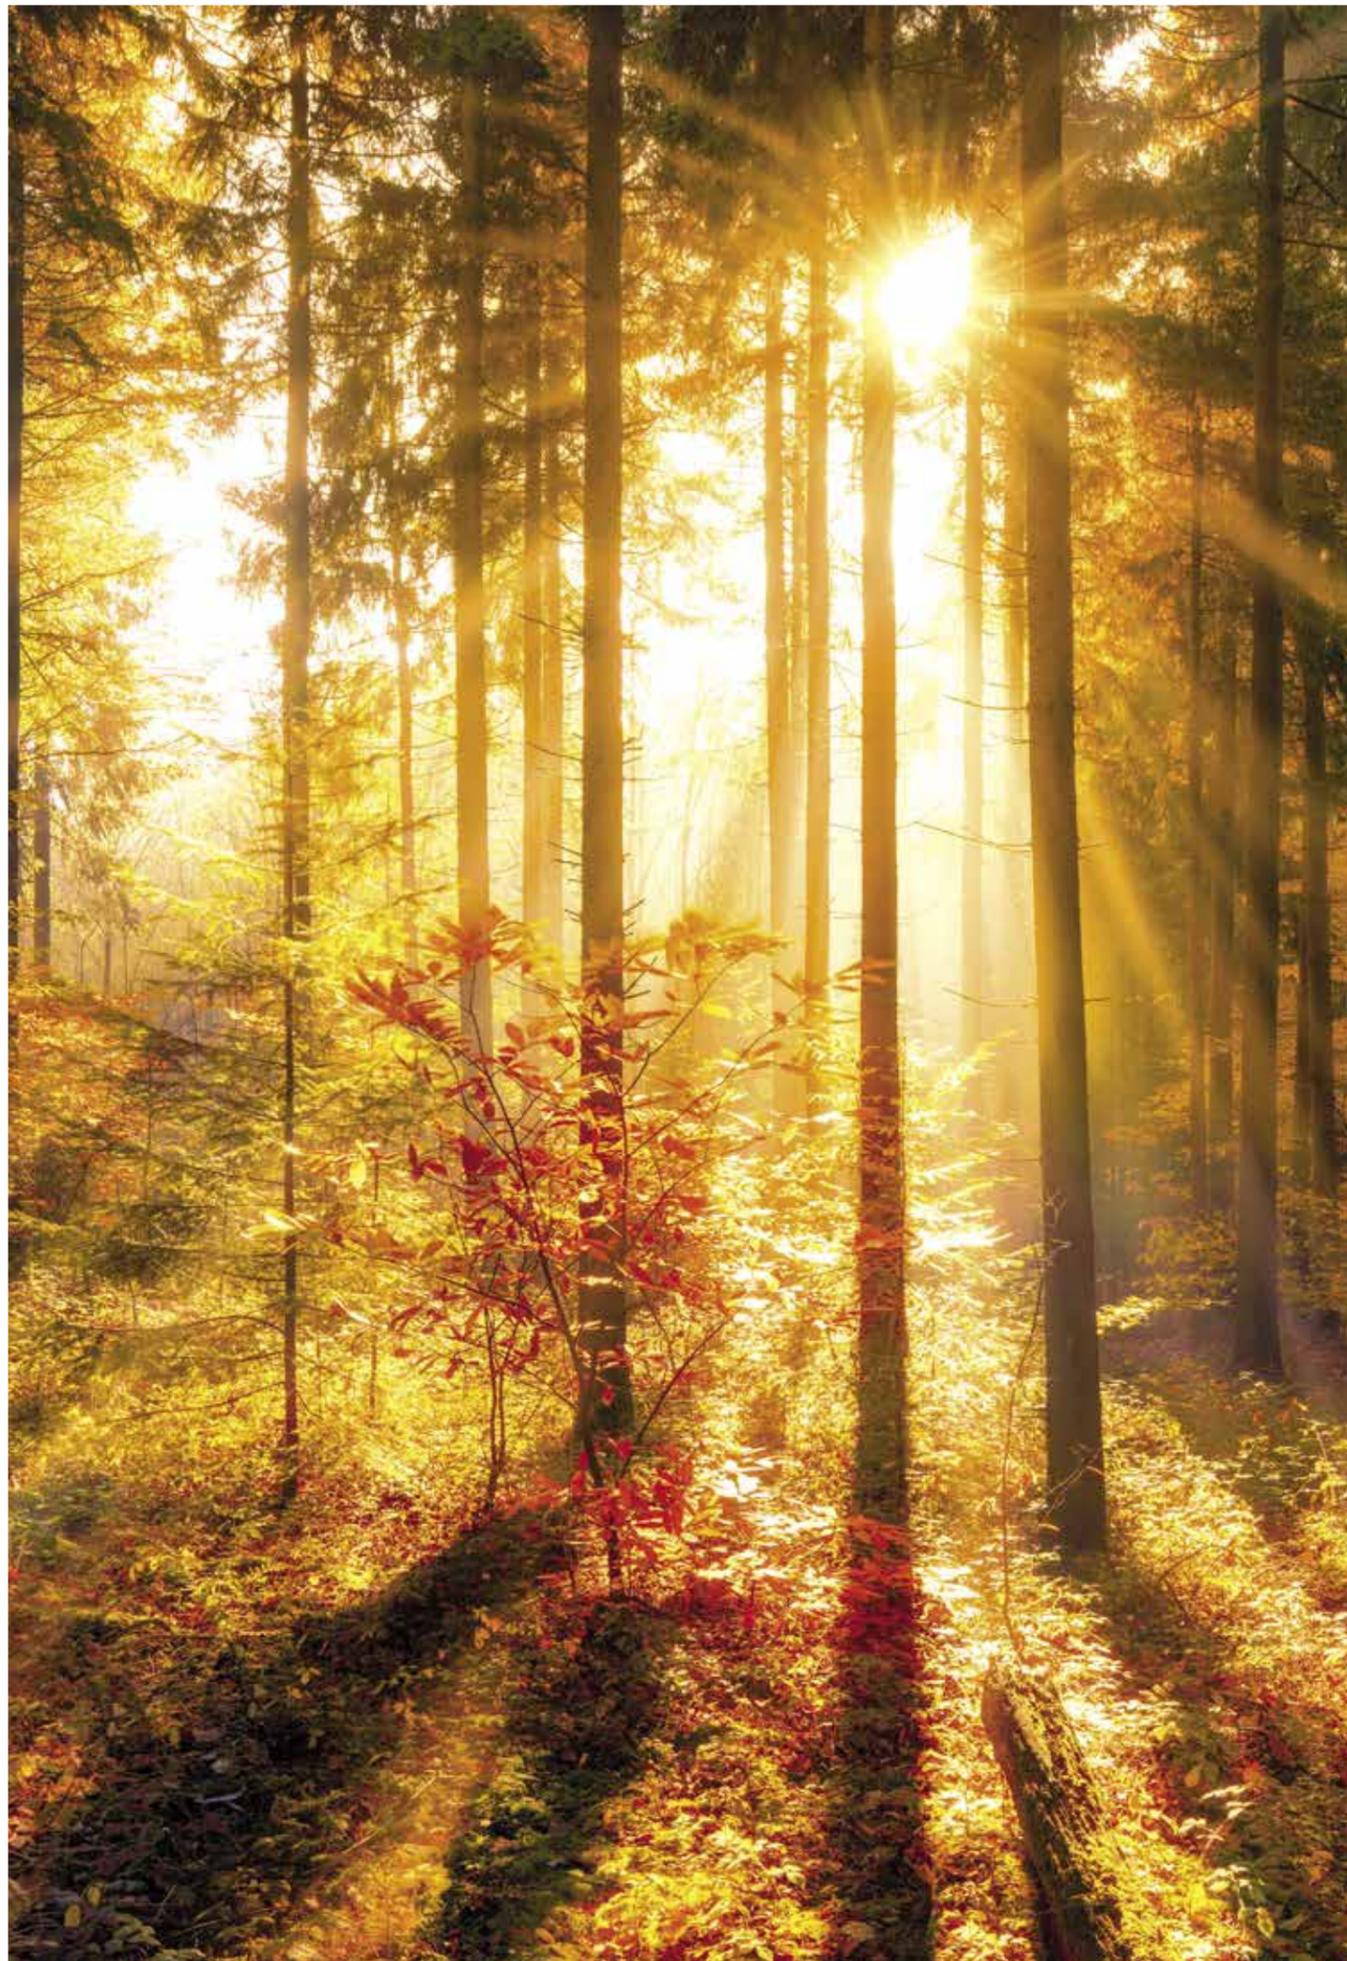

LOOSE FILLED PILLOW KAPOKPILLO MED

The ideal pillow for all seasons, thanks to its excellent ability to balance moisture and temperature. Because of the 100% kapok fibre filling, this pillow is extremely light-weight and elastic. The cover is made from 100% high-purity cotton. Will fit covers approx. 40 x 80 cm or 40 x 60 cm. For more information on our natural pillows please see page 66 ff.

LOOSE FILLED PILLOW FLEXOPILLO MED

This ideal pillow is extremely adaptable and lets you wake up refreshed and vitalised. Its filling is made from 100% natural latex flakes, which makes this pillow very springy with a subtle bounce that helps the muscles to relax. The pillow is fully washable. Will fit covers approx. 40 x 80 cm or 40 x 60 cm. For more information on our natural pillows see page 66 ff.

SLEEP SOFAS

DAY AND NIGHT

WE USE THE SAME PRECIOUS AND HEALTHY RAW MATERIALS FOR OUR SLEEP SOFAS AS WE DO FOR OUR MATTRESSES AND DIVAN BEDS – PURE NATURAL ONES!

ZEDULO_4 easily turns from sofa to comfy bed
with a lying surface of approx. 130 x 200cm.

WE USE OUR REGULAR UPHOLSTERY FABRIC MAX COTTON AS THE BASE COVER FOR OUR UPHOLSTERED BEDS. This cover is not removable and you can choose from 7 colour options. If, at a later stage, you decide to change your interior design scheme you can always order a new – e.g. removable and washable – cover made from a different upholstery fabric in a different colour and simply attach it to your bed. How is this possible? Because all of our divan beds feature Velcro fastenings at the base as standard!

DIVAN BEDS

UNIQUE

IF YOU WANT IT, GO FOR IT. WE MAKE SURE IT'S NATURAL.

The practical bed pouches provide storage space for things you want to keep close to you and can be freely positioned along the bed. A great optional extra!

The optional protective head covers add colour and contrast to your bedroom. Select your favourite fabric from any of our upholstery materials.

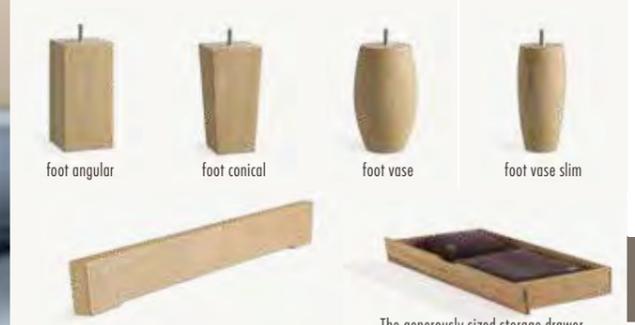

A bed in boxspring look made from pure natural materials without compromising health or comfort. Place the SYSTEM 7® elements onto the ledges on the inside of the frame – which are variable in height – and create the perfect foundation for the way you sleep. And to finish it all off, simply attach the inner cover using the zipper. Now you have your divan bed in boxspring look.

STELLA with bells and whistles: the high backboard (approx. 128.5cm) with Chesterfield finish and the optional quilted mattress cover in matching upholstery fabric (shown here upholstery fabric VARESE, colour SEA) together with a TOPPER and feet in style VASE (here in beech oiled).

The backboard with rounded corners or... .. angular. Whichever you prefer!

Our divan beds are made using only pure natural materials. The bed frame is made from upholstered and untreated solid beech wood (STELLA, STELLA SPECIAL EDITION) or from upholstered spruce wood (LOUNGE, VEGA, VEGA SPECIAL EDITION, VEGA BOXSPRING NATURAL). For the upholstery we use pure new organic wool, 100% natural latex and latex-coated coir. For the base cover we use the MAX COTTON fabric made from 100% cotton. The upholstery covers are attached by velcro fastenings and are removable. You can choose from a large selection of different fabrics and colours. We suggest you see your local dormiente retailer for the full swatch.

DIVAN BEDS HAND MADE

WHAT WE ARE MADE OF

OUR CAREFULLY SELECTED TIMBERS AND TYPES OF WOOD GIVE A UNIQUE LOOK AND CHARACTER TO EACH SOLID WOOD BED FRAME.

Our solid wood beds are crafted by hand. The attention to detail starts with selecting each individual timber. This allows us to take account of and work with the unique vein and colour present in each type of wood. The result is always a frame that is one of a kind.

Wood is a natural product and each tree grows differently. Variations in the colour or grain, even an occasional knothole, give your bed its unique character. Also sapwood may cause some deviations in colour.

BEECH FAGUS SYLVATICA

We use wood from the beech tree, the most common deciduous tree in Germany. To be botanically precise the tree should actually be referred to as Copper Beech because of the slightly reddish hue of the timber. Steam treating intensifies the colour and is done to reduce the propensity of the wood to develop fissures and to distort. Generally beech trees are felled between the ages of 80 to 120 years for timber production.

HEARTWOOD BEECH

Heartwood beech is the core wood of the Copper Beech and is characterised by a particularly vivid colour and vein. As the core wood of the beech tree is not always different in colour from the rest of the tree, the latest theory is that a strong vein and colour is a sign that defensive measures were employed by the tree as a reaction to fungal and viral attacks. We appreciate heartwood beech for its unique colourings.

BEECH OILED

HEARTWOOD BEECH OILED

WALNUT TREE JUGLANS REGIA

Timber for our frames comes from the walnut tree, or strictly speaking, the Common Walnut Tree. In North America this tree is commercially grown for its walnuts. Here, in Europe, walnut trees tend to only grow wild and are few and far between.

Timber from the walnut tree is one of the most precious hard woods and has been used in top-end furniture making for generations. Wood from the American Walnut Tree has a purple to dark brown colouring. The sapwood is of a lighter, white-yellowish hue.

If exposed to strong daylight walnut wood has a tendency to develop a brown colour with a hint of yellow. If this is not the colour you are after, please avoid putting your walnut wood furniture into direct sunlight.

WALNUT OILED

OAK OILED

WILDOAK OILED

OAK WHITE PIGMENTED

OAK BIANCO OILED

WILDOAK BIANCO OILED

OAK QUERCUS RUBOR (there are approx 400 sub-species)

The oak timber used in our bed frames comes from the second most common deciduous tree in Germany and belongs to the group of White Oaks. It is of a light brown colour and is characterised by its high density and hardness. The core of the timber is darker due to embedment of tannic acid.

WILDOAK

We refer to oak as wild oak when the timber displays quite dark and sometimes fissured knot-holes. This gives it a very vivid and individual look. Sometimes these knot-holes have to be closed using wood putty in order to obtain a smooth surface. This is something you should know if you choose a frame made from wild oak.

OAK WHITE PIGMENTED

By adding white pigments to the wood care oil the oak obtains a lighter colour without covering the natural grain.

OAK | WILDOAK BIANCO

By using the wood treatment oil BIANCO the varied hues in the oak wood are being neutralised and the beautiful vein enhanced.

THE BEAUTY OF NATURE

PLUS MANY HOURS OF CRAFTSMANSHIP – SPENT WITH LOVE OF AND ATTENTION TO DETAIL – BRING OUT THE TRUE CHARACTER IN OUR SOLID WOOD BEDS.

SWISS PINE PINUS CEMBRA

Swiss Pine is the name of a species of pine trees. In the alpine area, where it grows, it is also known as Arolla or Mountain Pine.

Swiss Pine trees grow in Europe in the Alps and Carpathian Mountains. We use Swiss Pine grown in the Austrian Alps. The trees grow up to 25 metres in height and can live to over 1,000 years. The wood is said to have very special properties and for many years people have been saying 'you can sleep better in a bed made from Swiss Pine'.

A study conducted by the Joanneum Research Institute (Weiz, Austria 2003) found that Swiss Pine had beneficial effects on the quality of sleep and the vegetative nervous system. For instance it was noted that the heart rate slowed down in the vicinity of Swiss Pine. In order not to interfere with these benefits, dormiente only finely sands down the Swiss Pine used in the bed frames. No other surface treatments are applied.

Swiss Pine is a soft wood, as is pine wood, and therefore slightly more susceptible to developing dents than our other woods, which are hard woods. It can also sometimes display resin ducts. On the other hand, it is this resin that contains the essential oils that are responsible for the very pleasant scent characteristic for Swiss Pine.

CHERRY OILED

SWISS PINE UNTREATED

CHERRY PRUNUS AVIUM

We use timber from the Sweet Cherry tree. The core wood from this tree displays a yellow-reddish colour with very attractive veins and is a much sought after precious wood. The sapwood has a more yellow-whitish colour.

For our bed frames we use timber from the North American Cherry Tree. Compared to the European variety, this wood is characterised by a more even and beautiful colour scheme. Also European cherry wood is not available as commercial timber, bar the odd individual piece.

Freshly felled cherry wood is quite light in colour but will darken considerably over the years to turn into a very beautiful reddish-brown.

WOODCARE

We particularly recommend oil finishing the wood. Partially for aesthetic reasons, because oil brings out the very beautiful surface of naturally grown wood and gives it its very own individual look. The more practical reason is because oil finished wood is easier to repair.

Small dents and scratches can be fixed by gently manually sanding down the wood and then re-applying some oil. If you no longer have the original oil to hand simply use a bit of olive or linseed oil and apply with a cloth.

In order for the Swiss Pine to be effective it is crucial that the wood is raw and untreated and therefore open-pored. Under no circumstances should you treat this wood with oil. Also we will have supplied it in an untreated state and any subsequent oil application would only cause stains. If the wood gets dirty just use a lightly damp cloth and wipe down. For more serious dirt, stains, dents or scratches please use very fine sandpaper and carefully sand the wood in the direction of the grain.

130 KELO exhibits a love of detail. This shows in the elegant shape of the feet but also in the backboard. Here the graceful curve also serves the practical function of keeping the pillows in place.

The outward curving feet give KELO its distinctive look.

The night table KALMERA (here shown in untreated Swiss Pine) ideally complements KELO MAXI due to its height of 55cm.

HEIGHT OF FRAME approx. 35.5 cm

The images show PLAIN (180x200cm) in heartwood beech oiled (top and centre) and walnut oiled (left).

TECHNICAL INFORMATION

SOLID WOOD BEDS FROM THE MANUFACTURER

dormiente.
MADE IN GERMANY

Our beds are available in a 200cm standard length and in special lengths of 190 | 210 | 220. They are available in widths of 90 | 100 | 120 | 140 | 160 | 180 | 200cm.

SPECIAL SIZES AVAILABLE ON REQUEST. Because we work with natural materials small variances in the measurements stated are possible.

TECHNICAL CHANGES RESERVED.

* Measured at highest point at side of bed. Please note the curved design of this model.

** optional
*** comfort height

1 = height of feet 11,0 cm
2 = height of feet 10,0 cm
3 = height of feet 14,0 cm

4 = height of feet 20,0 cm
5 = horizontal foot
6 = upright foot

7 = 3 options of backboards

CLOSE-IT BED BENCH | COFFEE TABLE
 approx. H 40 x W 140 x D 40 cm
 optional cushion approx. 67 cm x 40cm, 3cm natural latex seat cushion with insert and upholstery fabric of your choice

CLOSE-IT NIGHT TABLE
 approx. H 44.5 x W 40 x D 42 cm
 2 drawers that open partially, with soft-close function

CLOSE-IT CHEST OF DRAWERS
 approx. H 82.5 x W 84 x D 42 cm
 4 drawers that open completely, with soft-close function

CLOSE-IT DRESSER 1
 approx. H 119.5 x W 84 x D 42.5 cm
 2 doors and 4 shelves

EVERYTHING IN ITS PLACE

THE NEW SOLID WOOD DRESSERS AND CHESTS WILL STORE ANYTHING YOU MAY NOT WANT OUT IN THE OPEN. EVEN BETTER, THEY DO IT WITH SUCH STYLE.

CLOSE-IT DRESSER 2
 approx. H 119.5 x W 84 x D 42.5 cm
 2 doors, 4 shelves and 2 drawers that open completely, with soft-close function

SOLID WOOD FURNITURE **CLOSE-IT**

The impressive strength and solidity of the material makes a feature of the contemporary looking mortise and tenon joints.

You can open the drawers completely for easy access and close them gently thanks to their soft-close function.

WHAT DOES THIS ACTUALLY MEAN...

A SHORT INTRODUCTION TO THE CRITERIA, LABELS AND CERTIFICATIONS WE USE AND ARE GUIDED BY WHEN WE MAKE OUR NATURAL MATTRESSES AND BEDS.

PURITY SEAL

is our in-house dormiente seal of quality. It stands for more than 30 years of rigorously testing all our raw materials for pollutants and chemical residues.

QUL

is the association of producers and traders who aim to increase the use of natural latex in mattresses and to promote its benefits to a wider audience.

CERTIFIED ORGANIC HUSBANDRY

ensures animal welfare guidelines are followed, appropriate natural feed is given and medication is not routinely administered to livestock.

CERTIFIED ORGANIC AGRICULTURE

ensures that ecological criteria are adhered to in the farming of crops and other plant materials, e.g. no pesticides are allowed on cotton plants.

GOTS

stands for Global Organic Textile Standards and identifies textiles that have been made to organic standards.

GOLS

The Global Organic Latex Standard is the first and currently most comprehensive international standard covering the sustainable production of natural latex. All aspects of production are governed by strict criteria relating to environmental and social standards.*

* We are working towards having all of our natural latex products GOLS certified. Unfortunately the amount of natural latex grown to GOLS standard is at present too small to satisfy market demand.

ECO INSTITUT

is a privately owned lab that specialises in analysing various ranges of products and detecting chemicals that may be harmful to health. They are particularly experienced and active in the field of raw material used in the production of natural mattresses.

ÖKOTEST

is a German magazine that exists to test and analyse products of daily use for their effects on human health and the environment. Results of these tests are then published.

GREEN SELECTION 2016

included our Bed with System STELLA and our patented Sleep System SYSTEM7®. We are delighted that our ergonomic designed and 100% natural boxspring offering has attracted this attention and approval.

IGR

is the association of back posture trainers which evaluates products in terms of their effects on health particularly their effects on the human back and spine.

VEGAN

Of course we offer versions of our mattresses that only consist of plant materials without addition or application of materials from animal sources, such as wool or leather.

TIMBERS USED

in our products are all from certified sustainable forestry, for most part and whenever possible from sources close to our production facility.

WHAT A GREAT IDEA

THE ACCESSORIES WE OFFER FOR YOUR DIVAN BED ADD AN ATTRACTIVE VISUAL HIGHLIGHT AGAINST YOUR CHOSEN UPHOLSTERY FABRIC AND CAN ACCOMMODATE ALL THE THINGS YOU LIKE TO HAVE CLOSE TO YOU.

Attractive and practical. Our bed pouches and protective head covers can be chosen from our upholstery fabric selection.
